Manufacturing Happy Citizens Edgar Cabanas, Eva Illouz, 2019-07-26 The imperative of happiness dictates the conduct and direction of our lives There is no escape from the tyranny of positivity But is happiness the supreme good that all of us should pursue So says a new breed of so called happiness experts with positive psychologists happiness economists and self development gurus at the forefront With the support of influential institutions and multinational corporations these self proclaimed experts now tell us what governmental policies to apply what educational interventions to make and what changes we must undertake in order to lead more successful more meaningful and healthier lives With a healthy scepticism this book documents the powerful social impact of the science and industry of happiness arguing that the neoliberal alliance between psychologists economists and self development gurus has given rise to a new and oppressive form of government and control in which happiness has been woven into the very fabric of power

The Wisdom in Feeling Lisa Feldman Barrett, Peter Salovey, 2002-08-19 The fundamental concern of psychotherapy is change While practitioners are

constantly greeted with new strategies techniques programs and interventions this book argues that the full benefits of the therapeutic process cannot be realized without fundamental revision of the concept of change itself Applying cybernetic thought to family therapy Bradford P Keeney demonstrates that conventional epistemology in which cause and effect have a linear relationship does not sufficiently accommodate the reciprocal nature of causation in experience Written in an unconventional style that includes stories case examples and imagined dialogues between an epistemologist and a skeptical therapist the volume presents a philosophically grounded ecological framework for contemporary clinical practice
