The Laws of Robots Ugo Pagallo, 2013-05-16 This book explores how the design construction and use of robotics technology may affect today's legal systems and more particularly matters of responsibility and agency in criminal law contractual obligations and torts By distinguishing between the behaviour of robots as tools of human interaction and robots as proper agents in the legal arena jurists will have to address a new generation of hard cases General disagreement may concern immunity in criminal law e.g. the employment of robot soldiers in battle personal accountability for certain robots in contracts e.g. robo traders much as clauses of strict liability and negligence based responsibility in extra contractual obligations e.g. service robots in tort law Since robots are here to stay the aim of the law should be to wisely govern our mutual relationships

Growing Up Postmodern Ronald Strickland, 2002-06-25 This collection takes its inspiration from Paul Goodman's *Growing Up Absurd* a landmark critique of American culture at the end of the 1950s Goodman called for a revival of social investment in urban planning public welfare workplace democracy free speech racial harmony sexual freedom popular culture and education to produce a society that could inspire young people and an adult society worth joining In postmodernity Goodman's enlightenment era vision of social progress has been judged obsolete For many postmodern critics subjectivity is formed and expressed not through social investment but through consumption the freedom to consume has replaced political empowerment But the power to consume is distributed very unevenly and even for the affluent it never fulfills the desire produced by the advertising industry The contributors to this volume focus on adverse social conditions that confront young people in postmodernity such as the relentless pressure to consume social disinvestment in education harsh responses to youth crime and the continuing climate of intolerance that falls heavily on the young In essays on education youth crime counseling protest movements fiction identity formation and popular culture the contributors look for moments of resistance to the subsumption of youth culture under the logic of global capitalism
