The American Contractor ,1923 Disaggregation L.P. Ritzman,M. Tvrdý,2013-03-09 This volume is intended to
expand the dialogue and interest among both practitioners and academicians in a problem area worthy of attention by all The
concept of disaggregation admits to our current inability to solve many types of interrelated hierarchical problems
simultaneously It offers instead a sequential iterative process as a workable and necessary procedure The papers in this
volume are selected from those presented at a Disaggregation Conference held in March 1977 at The Ohio State University
We heartily applaud all those who participated in the conference and particularly appreciate the cooperation of those
authors whose work is published in this collection Part A contains four papers which define the various dimensions of
disaggregation The paper by Martin Starr which was the text of his luncheon address at the conference provides several
interesting perspectives to the problem Although disaggregation suggests tearing apart as Professor Starr illustrates with
his butterfly example it also suggests a putting together or a synthesis which recognizes interrelationships and dependencies
The next paper by Lee Kra jewski and Larry Ritzman offers a general model of disaggregation for both the manufacturing and
service sectors After reading the papers in this section as well as the papers in subsequent sections you will identify other
dimensions to hierarchical decision making which go beyond this generalized model Technical Abstract Bulletin ,1964
