Leveraging Applications of Formal Methods, Verification and Validation Tiziana Margaria, Bernhard Steffen, 2008-11-05 This volume contains the conference proceedings of ISoLA 2008 the Third International Symposium on Leveraging Applications of Formal Methods Verification and Validation which was held in Porto Sani Kassandra Chalkidiki Greece during October 13 15 2008 sponsored by EASST and in cooperation with the IEEE Technical Committee on Complex Systems Following the tradition of its forerunners in 2004 and 2006 in Cyprus and the ISoLA Workshops in Greenbelt USA in 2005 and in Poitiers France in 2007 ISoLA 2008 provided a forum for developers users and researchers to discuss issues related to the adoption and use of rigorous tools and methods for the specification analysis verification certification construction test and maintenance of systems from the point of view of their different application domains Thus the ISoLA series of events serves the purpose of bridging the gap between designers and developers of rigorous tools and users in engineering and in other disciplines and to foster and exploit synergetic relationships among scientists engineers software developers decision makers and other critical thinkers in companies and organizations In particular by providing a venue for the discussion of common problems requirements algorithms methodologies and practices ISoLA aims at supporting researchers in their quest to improve the utility reliability flexibility and efficiency of tools for building systems and users in their search for adequate solutions to their problems

A Study of Singularities on Rational Curves Via Syzygies David A. Cox, Andrew R. Kustin, Claudia Polini, Bernd Ulrich, 2013-02-26 Consider a rational projective curve C of degree d over an algebraically closed field k There are n homogeneous forms $g_1 \dots g_n$ of degree d in $k[x, y]$ which parameterize C in a birational base point free manner The authors study the singularities of C by studying a Hilbert Burch matrix φ for the row vector $g_1 \dots g_n$ In the General Lemma the authors use the generalized row ideals of φ to identify the singular points on C their multiplicities the number of branches at each singular point and the multiplicity of each branch Let p be a singular point on the parameterized planar curve C which corresponds to a generalized zero of φ In the triple Lemma the authors give a matrix φ whose maximal minors parameterize the closure in $\mathbb{P}^2$ of the blow up at p of C in a neighborhood of p The authors apply the General Lemma to φ in order to learn about the singularities of C in the first neighborhood of p If C has even degree $d = 2c$ and the multiplicity of C at p is equal to c then he applies the Triple Lemma again to learn about the singularities of C in the second neighborhood of p Consider rational plane curves C of even degree $d = 2c$ The authors classify curves according to the configuration of multiplicity c singularities on or infinitely near C There are 7 possible configurations of such singularities They classify the Hilbert Burch matrix which corresponds to each configuration The study of multiplicity c singularities on or infinitely near a fixed rational plane curve C of degree $2c$ is equivalent to the study of the scheme of generalized zeros of the fixed balanced Hilbert Burch matrix φ for a parameterization of C

C Handbook of Terahertz Technologies Ho-Jin Song, Tadao Nagatsuma, 2015-04-15 Terahertz waves which lie in the frequency range of 0.1–10 THz have long been investigated in a few limited fields such as astronomy because of a lack of devices for their generation and detection. Several technical breakthroughs made over the last couple of decades now allow us to radiate and detect terahertz waves more easily, which has triggered *Commutative Algebra and Its Connections to Geometry* Alberto Corso, Claudia Polini, 2011-10-20 This volume contains papers based on presentations given at the Pan American Advanced Studies Institute PASI on commutative algebra and its connections to geometry which was held August 3–14, 2009 at the Universidade Federal de Pernambuco in Olinda, Brazil. The main goal of the program was to detail recent developments in commutative algebra and interactions with such areas as algebraic geometry, combinatorics, and computer algebra. The articles in this volume concentrate on topics central to modern commutative algebra: the homological conjectures, problems in positive and mixed characteristic, tight closure and its interaction with birational geometry, integral dependence, and blowup algebras, equisingularity theory, Hilbert functions and multiplicities, combinatorial commutative algebra, Grobner bases, and computational algebra. **FM 2009: Formal Methods** Ana Cavalcanti, Dennis Dams, 2009-10-26 The 16th International Symposium on Formal Methods marked the 10th anniversary of the First World Congress on Formal Methods that was held in 1999 in Toulouse, France. We wished to celebrate this by advertising and organizing FM 2009 as the Second World Congress in the FM series, aiming to once again bring together the formal methods communities from all over the world. The statistics displayed in the table on the next page include the number of countries represented by the Programme Committee members as well as of the authors of submitted and accepted papers. Novel this year was a special track on tools and industrial applications. Submissions of papers on these topics were especially encouraged but not given any special treatment. It was just as hard to get a special track paper accepted as any other paper. What we did promote, however, was a discussion of how originality, contribution, and soundness should be judged for these papers. The following questions were used by our Programme Committee. **Proceedings of the 7th International Conference on Advanced Technology & Particle Physics** Maura Barone, 2002 This book features up-to-date technology applications to radiation detection. It synthesises several techniques and approaches to radiation detection, covering a wide range of applications and addressing a large audience of experts and students. Many of the talks are in fact reviews of particular topics often not covered in standard books and other conferences; for instance, the medical physics section. To present these medical physics talks is crucial since a large fraction of the community in medical physics are from the particle physics community. The same feature is true for astroparticle and space physics, which are relatively new fields. This book is unique in its scope. Except for IEEE, there is no other conference in the world that presents such a wide coverage of advanced technology applied to particle physics. However, unlike IEEE, more room is made in the book for reviews and general talks. **Advanced Photonics Metasurfaces: Design, Fabrication, and Applications** Xufeng Jing, Haiyong Gan, Zhi Hong, Chee Leong Tan, 2021-07-15

World's Worst Westerns Plus Some of the Best Your Guide to the Best of the Worst John Howard

Reid,2015-09-11 Once by far Hollywood s largest category of popular movies Westerns are now out of fashion with the movie going public but they still hold a commanding presence on DVD Until recently Westerns were one of the most popular DVD categories third only to action and science fiction Many many titles from the 1930s and 1940s were made by small independent companies that no longer exist A huge number of westerns are therefore in the public domain and are now available on DVD from outlets like Alpha and Grapevine In fact there are currently so many titles on DVD that guides like World s Worst Westerns are not a luxury or an addenda but an absolute necessity for collectors who wish to spend their money wisely by buying titles they will enjoy In fact for western fans like myself a book like World s Worst Westerns is not just a novelty but an absolute necessity *WWD Buyer's Guide* ,1996 **"The" Academy** ,1888 **American**
