Soul Matters Mabel Aghadiuno,Jas

Kalsi,2017-11-22 In recent years many have come to believe that Western medicine has lost contact with holistic conceptions of health as encompassing physical emotional intellectual social and spiritual dimensions Spiritual may imply religious or faith based values or experience but also non material factors such as an appreciation of natural beauty art music moral values or beliefs from which a person draws meaning and a sense of transcendence Equally many people are unaware of a spiritual dimension to life and health until illness or trauma strikes However coming to terms with life events deriving meaning from them and incorporating them into their life philosophy may then be experienced as a deep spiritual crisis with ramifications in their wider health and implications for the health professionals who treat them This book considers the meaning of holistic health care and explores the spiritual dimension of health through the narratives of fictional and non fictional patients It discusses how to discern when a patient s distress has a spiritual dimension the implications of this for health professionals and ways in which spiritual factors can be addressed and discussed within healthcare When it comes to questions about meaning and purpose such as what is the point of all this A or why is this happening to me A when we meet patients in the depths of despair at the prospect of imminent death when we ourselves feel hopeless and overwhelmed in the face of an avalanche of human suffering then we begin to struggle We do not know what we could do nor even what we should do Our professional training doesn t help We are stuck With this beautiful book Mabel Aghadiuno comes to our rescue Christopher Dowrick in his Foreword The Objective Structured Clinical Examination Review Mubashar Hussain

New Religious Movements and Comparative Religion Olav Hammer, Karen Swartz, 2024-02-28 This Element provides an introduction to a number of less frequently explored approaches based upon the comparative study of religions New religions convey origin myths present their particular views of history and craft Endtime scenarios Their members carry out a vast and diverse array of ritual activities They produce large corpuses of written texts and designate a subset of these as a sacrosanct canon They focus their attention on material objects that can range from sacred buildings to objects from the natural world that are treated in ritualized fashion The reason for this fundamental similarity between older and newer religions is briefly explored in terms of the cognitive processes that underlie religious concepts and practices A final section returns to the issue of how such shared processes take specific shapes in the context of modern Western societies
