WHERE WHEN AND HOW ANCESTRAL (LUCA) TO ALL LIFE ORIGINATED Jagjit Singh Rawat, 2021-12-06 The book is all about the living beings All living beings including humans have originated and evolved from the Last Universal Common Ancestor LUCA that was possible as a result of spontaneous step by step chemical origin in about 3 750 billion years ago from the elements consisting of life body such as nitrogen bases adenine thymine cytosine guanine and uracil which are made up off the elements C H O N and ribose sugar This life originated in the sediments of the palaeo floodplains at the palaeo mouths of fresh water flows rivers on the Hadean surface in the Archaean Eon This was a global phenomenon The life on the rocky planet like our Earth was possible because of existence of fresh water bodies over minerals metals and clay deposits which rested on Hadean surface and active geological processes and active environments The book also makes an attempt to explain as to how do the simple elements like C H O N S and P first change to simple chemistry H_2O NH_3 followed by CH_4 HCN and monomers monosaccharides amino acids glycerol s fatty acids nucleotides and polymers carbohydrates proteins lipids and nucleic acids There was not much development for about 3210 million years from 3750 million years to 540 million years and suddenly changed jumped to complex life forms in about 541 million years ago Here the life originated and evolved without head and heart from 3750 million years ago to 522 million years ago i e for about 3228 million years The head was originated and evolved in about 521 million years ago However consciousness emerged along with bonding of carbon with hydrogen and other elements which were finally converted into nucleosides having nitrogenous base and ribose sugar The gravity and gravitational force intertwined with electromagnetic force were the reason there were bonding of carbon and hydrogen and other elements to originate and evolve LUCA which stayed away from thermodynamic equilibrium

The Elements of Agriculture George E. Waring, 2022-09-04

In *The Elements of Agriculture* George E Waring presents a seminal work that intricately weaves together the scientific principles of agriculture with practical applications. This book, written in clear accessible prose, stands out as a crucial text during the 19th century, a period marked by rapid advancements in agricultural science. Waring's methodical approach explores fundamental concepts such as soil management, crop rotation, and the importance of sustainable practices, urging farmers to move beyond traditional methods in favor of evidence-based techniques. His integration of empirical observations with theoretical frameworks reflects the burgeoning agricultural movement of the time, emphasizing the shift towards a more systematic understanding of farming as a science. George E Waring, an influential figure in agronomy and environmental science, was driven by a desire to improve agricultural practices for both economic and ecological sustainability. His experiences as a farmer and a land surveyor provided him with a unique perspective on the challenges faced by the agrarian community. Waring's dedication to education and reform in agriculture is evident throughout the text, where he champions the implementation of progressive techniques to enhance productivity and promote environmental stewardship. This book is essential for anyone interested in the foundations of modern agriculture, as well as for historians and environmentalists seeking insight into the evolution of farming practices. Waring's clear exposition and passionate advocacy for scientific agriculture make *The Elements of Agriculture* a timeless resource, inviting readers to reflect on the critical relationship between agriculture and environmental sustainability.
