Development of executive function during childhood Yusuke Moriguchi, Philip D Zelazo, Nicolas Chevalier, 2016-04-01 Executive function refers to the goal

oriented regulation of one's own thoughts, actions, and emotions. Its importance is attested by its contribution to the development of other cognitive skills, e.g., theory of mind, social abilities, e.g., peer interactions, and academic achievement, e.g., mathematics, and by the consequences of deficits in executive function which are observed in a wide range of developmental disorders such as attention deficit hyperactivity disorder and autism. Over the last decade, there has been growing interest in the development of executive function, and an expanding body of research has shown that executive function develops rapidly during the preschool years, with adult level performance being achieved during adolescence or later. This recent work, together with experimental research showing the effects of interventions targeting executive function, has yielded important insights into the neurocognitive processes underlying executive function. Given the complexity of the construct of executive function, however, and the multiplicity of underlying processes, there are often inconsistencies in the way that executive function is defined and studied. This inconsistency has hampered communication among researchers from various fields. This Research Topic is intended to bridge this gap and provide an opportunity for researchers from different perspectives to discuss recent advances in understanding childhood executive function. Researchers using various methods, including behavioral experiments, neuroimaging, eye tracking, computer simulation, observational methods, and questionnaires, are encouraged to contribute original empirical research. In addition to original empirical articles, theoretical reviews and opinions, perspective articles on promising future directions are welcome. We hope that researchers from different areas, such as developmental psychology, educational psychology, experimental psychology, neuropsychology, neuroscience, psychiatry, computational science, etc., will be represented in the Research Topic.

The Publishers' Circular and Booksellers' Record, 1916      **Publishers' Circular and Booksellers' Record of British and Foreign Literature**, 1916      *Leading improvement in school community wellbeing* Donna Cross, Leanne Lester, 2023-12-01. More than ever before, the wellbeing of students, staff, and the school community must be a priority for principals and school leaders. *Leading Improvement in School Community Wellbeing* provides a framework for a set of high-impact strategies that individually and together can be the focus of improving wellbeing across the school. The book provides school leaders with key research-based school improvement practices, authentic case studies in the form of principals' reflections, and crucially, practical explanations outlining how to choose a particular practice and how to successfully embed or implement that strategy within the school. Asking 'What's happening?', 'What's working?', and 'What's next?' the three parts of the book provide tools to assess the school community's wellbeing, strengths, and needs, to determine actions required to improve student and staff wellbeing, and to effectively implement wellbeing strategies across the school for the benefit of the entire school community.      **The Publisher**, 1916      British Books, 1916
