Assessing Listening for Chinese English Learners Pan Zhixin, 2016-12-08 This book reports in detail the newly developed Communicative Listening Comprehension Test CLCT for the National College English Test CET of China. Following the principles of communicative testing in general and test construction approach proposed by Bachman and Palmer 1996 in particular the project develops CLCT for CET 4 and CET 6. The research begins with the construction of frameworks of listening task characteristics and communicative listening ability. Subsequently based on a survey of Chinese college students' English listening needs and an analysis of listening tasks in influential English listening course books and public tests CLCT 4 and CLCT 6 test specifications are developed. Finally sample papers are produced and a series of posteriori studies are conducted to examine the difficulty and usefulness of the newly developed notes completion task type in two CLCT tests. As an example of successful integration of communicative testing theories and test construction practice this research provides valuable insights into listening test development for other large scale tests.
