Protein Chemistry Joe Regenstein,2012-12-02 Food Protein Chemistry An Introduction for Food Scientists discusses food

proteins and how they are studied Proteins are both biological entities and physicochemical compounds and they will be examined in both contexts in this volume The chemical and physical properties of proteins will be viewed from the

perspective of chemists despite the fact that their use in the food supply emphasizes their biological nature Key topics

discussed include proteins as essential to life amino acids protein classification selected proteins of the most important food

systems and protein structure The book also includes chapters on protein measurement protein purification and spectral

techniques for the study of proteins The book requires readers to have the equivalent of the Institute of Food Technologists

requirements for undergraduate food science majors It also assumes a knowledge of math through calculus While primarily

intended for senior and first year graduate food science students the text may also be useful to researchers in allied fields
