of a medium class launch vehicle under estimation of costs by the decadal survey and unfunded programmatic changes that were required by Congress and the Office of Management and Budget In addition the National Oceanic and Atmospheric Administration NOAA has made significant reductions in scope to its future Earth environmental observing satellites as it contends with budget shortfalls Earth Science and Applications from Space A Midterm Assessment of NASA s Implementation of the Decadal Survey recommends a number of steps to better manage existing programs and to implement future programs that will be recommended by the next decadal survey The report also highlights the urgent need for the Executive Branch to develop and implement an overarching multiagency national strategy for Earth observations from space a key recommendation of the 2007 decadal survey that remains unfulfilled **Science Tutor, Grades 6 - 8**

conducted on the International Space Station ISS They encompass work on cell science and studies of the use of microgravity to grow high quality protein crystals Both these subdisciplines are advancing rapidly in terrestrial laboratories fueled by federal and industrial research budgets that dwarf those of NASA s life science program Forging strong and fruitful connections between the space investigations and laboratory bench biologists a continual challenge for NASA s life sciences program is thus of great importance to ensuring the excellence of ISS research This report evaluates the plan for NASA s biotechnology facility on the ISS and the scientific context that surrounds it and makes recommendations on how the facility can be made more effective In addition to questions about optimizing the instrumentation the report addresses strategies for enhancing the scientific impact and improving the outreach to mainstream terrestrial biology No major redirection of effort is called for but collectively the specific targeted changes recommended by the task group would have a major effect on the conduct of biotechnology research in space
