Climate Change and Adaptation Planning for Ports Adolf K. Y. Ng, Austin Becker, Stephen Cahoon, Shu-Ling Chen, Paul Earl, Zaili Yang, 2015-08-14 As key links in transportation and supply chains the effect of climate change on seaports has broad implications for the development prospects of the global economy However the picture is very uncertain because the impacts of climate change will be felt very differently around the world both positively and negatively This book addresses the need for quality theoretical analysis highly innovative assessment methodologies and insightful empirical global experiences so as to identify the best international practices planning and appropriate policies to effectively adapt to develop resilience and indeed benefit from the impacts posed by climate change on transportation and supply chains This book comprises of theories methodologies and case studies from five continents Asia Europe Latin America North America and Oceania addressing climate change and the adaptation planning of ports and transportation infrastructures With reputable contributors from academic policymaking and professional sectors it critically analyses the recent attempts by ports in establishing adaptation plans and strategies so to enhance ports and other transportation infrastructures resilience to the climate change risks This is the first book of its kind to focus on climate change adaptation for ports It offers useful and comprehensive guidance to senior policymakers industrial practitioners and researchers who are eager to understand the dynamics between climate change adaptation planning of ports and transportation infrastructures *Errorless UPPSC General Studies Prelim Paper 1 - 10 Year-wise Solved Papers (2010 - 19)* Disha Experts, 2020-07-21 , **Ecological, Societal, and Technological Risks and the Financial Sector** Thomas Walker, Dieter Gramlich, Mohammad Bitar, Pedram Fardnia, 2020-06-10 Today s financial sector faces multiple challenges stemming from ecological societal and technological risks such as climate change political extremism and cyber attacks However these non traditional risks are yet to be fully identified and measured in order to ensure their successful management This edited collection sheds light on the topic by examining the unique measurement and modelling challenges associated with each of these risks and their interaction with finance Offering a comprehensive analysis of non traditional finance risks the authors provide the basis for developing appropriate risk management techniques With new approaches to protect against emerging threats to the financial sector this edited collection will appeal to academics researching sustainability development finance and risk management as well as policy makers and practitioners within the banking sector General Studies Paper I EDITORIAL BOARD, 2015-01-09 Developed by experienced professionals from reputed civil services coaching institutes and recommended by many aspirants of Civil Services Preliminary exam General Studies Paper I contains Precise and Thorough Knowledge of Concepts and Theories essential to go through the prestigious exam Solved Examples are given to explain all the concepts for thorough learning Explanatory Notes have been provided in every chapter for better understanding of the problems asked in the exam v publishers *Pseudogap and Precursor Superconductivity Study of Zn doped YBCO* Ece Uykur, 2015-02-26 In this thesis

the pseudogap and the precursor superconducting state which are of great importance in clarifying the superconductivity mechanism in high temperature cuprate superconductors are investigated with a c axis optical study in  $\text{YBa}_2\text{Cu}_{1-x}\text{Zn}_x\text{O}_y$ . Testing was performed over a wide energy range with smaller temperature intervals for several Zn substituted samples as well as for several carrier doping levels. A spectral weight SW analysis in which the pseudogap behavior can be separated from the superconducting condensate with the SW transfer to the high energy region revealed that the pseudogap is not the precursor of the superconductivity carriers moving to the high energy region with pseudogap opening never contribute to the superconducting condensation. Moreover the high energy transfer continues even below  $T_c$  for the Zn substituted samples in which we weaken the superconductivity which gives evidence to the coexistence of the pseudogap and the superconducting gap below  $T_c$ . On the other hand the analysis of optical conductivity revealed that a precursor state to superconductivity can be defined at temperatures much higher than  $T_c$ . The superconducting carrier density  $n_s$  was calculated for each temperature above and below  $T_c$  and the results confirmed the existence of  $n_s$  at temperatures above  $T_c$ . The observed real superconducting condensate  $n_s$  above  $T_c$  puts a serious constraint on the theory for high  $T_c$  superconductivity. A theory based on an inhomogeneous superconducting state in which a microscopically phase separated state in a doped Mott insulator can be observed is the most plausible candidate. This theory can explain the existence of  $n_s$  and the observed temperature range for the precursor superconducting state. The results obtained show that the pseudogap coexists with superconductivity below  $T_c$  and is not the precursor of superconductivity. On the other hand it is also possible to define a precursor superconducting state that is different than the pseudogap. The temperature range and the observed superconducting condensate in this state can be explained with the help of the inhomogeneous superconducting state.

**Evidence in Anti-Doping at the Intersection of Science & Law** Marjolaine Viret, 2015-10-31. This book is a comprehensive practice oriented guide to the evidentiary regime under the 2015 World Anti Doping Code (WADC) including the functioning of the Athlete Biological Passport. It is the first to show how the interplay between science and law affects the collection and evaluation of evidence in anti doping and how paradigm shifts in anti doping strategies may modify evidentiary assumptions implicit to the WADC regime. Unique in its dealing with the subtleties of anti doping science and legal implications, the book gives lawyers involved in anti doping the keys to a better understanding of the science underlying the WADC regime while providing anti doping scientists with the first reference material to understand the legal framework in which their activities are embedded. The emphasis of the book is on international doping cases and it relies predominantly

on CAS awards published up to Spring 2015 Written by an experienced Swiss lawyer it provides an insight into the Swiss legal system and its importance for the legal practice in doping matters Marjolaine Viret is an attorney at law in Geneva Switzerland specialising in sports and health law She has gained significant experience in sports arbitration as a senior associate in one of Switzerland's leading law firms She also holds positions within committees in sport in particular as a member of the UCI Anti Doping Commission Ms Viret had her doctorate on anti doping approved summa cum laude in 2015 She participates as a researcher in a project for a commentary of the 2015 WADC funded by the National Science Foundation and is regularly invited to lecture or speak in various fields of sports law The book appears in the ASSER International Sports Law Series under the editorship of Dr Dave McArdle Prof Dr Ben Van Rompuy and Marco A van der harst LL M Order, Disorder And Criticality: Advanced Problems Of Phase Transition Theory - Volume 7 Yurij Holovatch,2022-12-06 This book is the seventh volume of review chapters on advanced problems of phase transitions and critical phenomena the former six volumes appeared in 2004 2007 2012 2015 2018 and 2020 The aim of the book is to provide reviews in those aspects of criticality and related subjects that are currently attracting much attention due to essential new contributions The book consists of five chapters They discuss criticality of complex systems where the new emergent properties appear via collective behaviour of simple elements as well as historical aspects of studies in the field of critical phenomena Since all complex systems involve cooperative behaviour between many interconnected components the field of phase transitions and critical phenomena provides a very natural conceptual and methodological framework for their study As the first six volumes this book is based on the review lectures that were given in Lviv Ukraine at the Ising lectures a traditional annual workshop on complex systems phase transitions and critical phenomena which aims to bring together experts in these fields with university students and those who are interested in the subject *State-of-the-Art of High Power Gyro-Devices and Free Electron Masers.
