Marshall's correspondence to his American friends was full of references to the missionaries and especially to the efforts to make the same public use of the Bible, and to the influence of the Bible on the people. He was a man of great energy and ability, and he was a man of great faith. He was a man of great faith in the power of the Bible to transform the lives of the people. Members' contributions show the funds generally met the targets of £1.25 per person. Managing authorities' expenditure on supplementary activities was around 10 per cent of budget (only at some points in the year did this exceed), and about quarter the expenditure on projects involving the public (which was 10 per cent of the general budget). Although the majority, more than two-thirds, are identified in the annual report, we observed that some small projects were just better than others and that some general budget expenditure was spent on things that were not identified in the annual report.

Multi-level management involvement is generally only implemented following requests from below to address existing and emerging HR issues and the opportunity to focus work on specific HR problems currently facing the general manager. Encouraging and protecting the general manager's discretionary efforts and involvement in HR issues is imperative for the organization's success, and the senior management needs to recognize that the senior management's role is to create an environment that supports the efforts of middle management and allows them to focus on doing their job. The organization must also encourage and protect the efforts of middle management.

On Wednesday night, approximately 100,000 people gathered on the roof of the Kohn Building for the Assembly's session on the emergency budget, calling the Senate's position on the emergency bill "a complete failure." The Assembly passed the bill, 100-0, and the Senate's position was rejected. The Assembly's action was a major victory for the emergency budget. Students will often produce a sentence describing an event and then quickly translate it to the next step in the process. For instance, a child might say, "I'm washing my hands," and then say, "I'm drying my hands." The teacher can then ask the student to describe the next step in the process, such as "I'm putting on my shirt." This can help the student to understand the sequence of events and to use the correct vocabulary to describe them.
