#### Hazard Alert Messages

Read and observe all Warning and Caution hazard alert messages in this publication. They provide information that can help prevent serious personal injury, damage to components, or both.

##### WARNING

To prevent serious eye injury, always wear safe eye protection when you perform vehicle maintenance or service.

Park the vehicle on a level surface. Block the wheels to prevent the vehicle from moving. Support the vehicle with safety stands. Do not work under a vehicle supported only by jacks. Jacks can slip and fall over. Serious personal injury and damage to components can result.

If you require technical assistance, contact our Customer Service Center at 800-525-5040. Technical publications for all Meritor WABCO products are available on our website.

#### Overview

##### WARNING

RSS is an advanced vehicle control system from Meritor WABCO that reduces chances of a rollover and gives the driver better maneuverability and control. However, any vehicle may overturn in some situations with or without RSS.

Having RSS does not allow drivers to take unnecessary risks. Make sure drivers do not take curves or turns faster than they would without RSS and always use safe driving techniques. Failure to do so can result in serious personal injury, damage to components, or both.

Meritor WABCO's roll stability support provides an independent stability system for single, tandem or tri-axle constant-powered trailers equipped with air suspensions. It is compatible with both disc and drum foundation brakes. The system consists of:

- An electronic control unit (ECU)/valve modulator valve assembly with built-in pressure sensors to monitor control and supply pressure, as well as air load. A lateral accelerometer incorporated into the ECU monitors trailer stability.
- RSS power PLC adapter
- Two or four wheel speed sensors
- Diagnostic cable (bracket not provided)
- Lateral control line pressure sensor and cable (optional)
- WABCO diagnostic software

#### Trailer Configurations

- This installation guide covers 2S/2M or 4S/2M trailer ABS with RSS installations. Sensor installation procedures are based on using ABS-prepped sites.
- RSS is not available for 2S/1M trailer installations.
- RSS is not available for full trailers, doublets or triplets.
  - S: Number of Sensors
  - M: Number of Modulator Valves

#### Load Proportioning Function Information

All RSS ECU/valve assemblies are pre-programmed with default parameters. Normal loading is performed at a 1:1 relationship, so the load proportioning function of the system is inactive.

The RSS system can also be used with the load proportioning function active which provides braking based on the weight of the trailer. Please contact Meritor WABCO at 800-525-5040 for further details. The service technician at this number will be able to connect you with a Meritor WABCO engineer.
