The text focuses on identity and how every human being forges an identity in a globalized world. It includes recurring coverage of identity and how people make places and shape identities to see global, local, and individual implications of decisions that people make every day. The main objective of this issue is to provide more understanding of human systems from a spatial perspective, ways to think globally, and ways to understand real-world implications of Human Geography. The text will help encourage a better understanding of how to create an identity in a globalized world and how decisions happen in a global context and can have global impacts. *Post-Anthropocentric Social Work* Vivienne Bozalek, Bob Pease, 2020-12-21 This book seeks to trouble taken-for-granted assumptions of anthropocentrism and humanism in social work, those which perpetuate human privilege and human exceptionalism. The edited collection provides a different imaginary for social work by introducing ways of thinking otherwise that challenge human exceptionalism. Social work is at heart a liberal humanist project informed by a strong human rights framework. This edited collection draws on the literature on affect, feminist new materialism, and critical posthumanism to critique the liberal framework which includes human rights. Disrupting the anthropocentrism in social work, which positions humans as an elite species at the centre of world history, this book develops an ethical sensibility that values entanglements of humans, non-human life, and the natural environment. The book provides new insights into environmental destruction, human-animal relations, gender inequality, and male dominance, as well as indigenous and settler colonial issues and critical and green social work. It will be of interest to all scholars and students of social work, community development, social policy, and development studies more broadly.
