- the 1990s, the industry has been hit hard by a combination of factors. The most significant of these is the decline in the number of new cars sold in the United States. This has been caused by a number of factors, including a decline in the number of people who can afford to buy a car, a decline in the number of people who want to buy a car, and a decline in the number of people who are able to get a loan to buy a car. The industry has also been hit by a decline in the number of people who are able to get a loan to buy a car. This has been caused by a number of factors, including a decline in the number of people who can afford to buy a car, a decline in the number of people who want to buy a car, and a decline in the number of people who are able to get a loan to buy a car. The industry has also been hit by a decline in the number of people who are able to get a loan to buy a car. This has been caused by a number of factors, including a decline in the number of people who can afford to buy a car, a decline in the number of people who want to buy a car, and a decline in the number of people who are able to get a loan to buy a car.

- Figure 1.10 illustrates the concept of a **control volume** (CV) in fluid mechanics. A control volume is a fixed region in space through which fluid flows. The boundary of the control volume is called the **control surface** (CS). The fluid within the control volume is the **control mass** (CM). The control volume is defined by a control surface that is fixed in space. The control mass is the fluid that is contained within the control volume at any given time. The control volume is a fixed region in space, while the control mass is a fixed amount of fluid.
