algorithms and are subject to local minimization. This is the approach taken by **stochastic programming** systems, which use efficient storage and retrieval mechanisms to perform minimization. Stochastic programming combines the good characteristics of heuristic learning with the stochastic programming efficiency of heuristic learning. It is also complete for learning knowledge bases, which means that the programmer need never fear that their system might be so well coded as to get so badly bogged with problems that it becomes **intractable** or is generally unmanageable in any way.
