The unknown Sea Colin Janssen, Jan Mees, 2025-06-17 Humans are at home on land not in the sea We know more about the surface of Mars than about our own deep sea The ocean contains the highest mountains on Earth and is home to countless mysterious sea creatures that have barely been studied Due to this lack of knowledge we underestimate the crucial role the ocean plays for the planet and therefore also for humanity for example in the fight against climate change This book aims to change that Based on the latest scientific insights it seeks to immerse the reader through storytelling in the hidden beauty and complex workings of the ocean The authors explain how ocean warming acidification overfishing and pollution threaten not only its fragile flora and fauna but also us Yet all is not lost technological revolutions offer hope if we act in time The Unknown Sea explores how we can rise to the challenges The Unknown Sea is officially endorsed as an Ocean Decade Activity under the United Nations Decade of Ocean Science for Sustainable Development 2021-2030 This recognition highlights the book's contribution to advancing ocean knowledge and supporting global efforts towards a more sustainable and resilient ocean Through its insights and perspectives The Unknown Sea aligns with the Ocean Decade's mission to transform ocean science into actionable solutions for society
