Ocean Worlds Jan Zalasiewicz, Mark Williams, 2014-10-24 Oceans make up most of the surface of our blue planet. They may form just a sliver on the outside of the Earth but they are very important not only in hosting life including the fish and other animals on which many humans depend but in terms of their role in the Earth system in regulating climate and cycling nutrients. As climate change pollution and over exploitation by humans puts this precious resource at risk it is more important than ever that we understand and appreciate the nature and history of oceans. There is much we still do not know about the story of the Earth's oceans and we are only just beginning to find indications of oceans on other planets. In this book geologists Jan Zalasiewicz and Mark Williams consider the deep history of oceans how and when they may have formed on the young Earth topics of intense current research how they became salty and how they evolved through Earth history. We learn how oceans have formed and disappeared over millions of years how the sea nurtured life and what may become of our oceans in the future. We encounter some of the scientists and adventurers whose efforts led to our present understanding of oceans. And we look at clues to possible seas that may once have covered parts of Mars and Venus that may still exist below the surface on moons such as Europa and Callisto and the possibility of watery planets in other star systems.

Running The World Nick Butter, 2020-11-12 Superb a great book to fuel your wanderlust Mark Beaumont The ultimate running book showcasing the ultimate running adventure Sean Conway In 2019 Nick Butter became the first person to run a marathon in every country on Earth This is Nick s story of his world record breaking adventure and the extraordinary people who joined him along the way On January 6th 2018 Nick Butter tied his laces and stepped out on to an icy pavement in Toronto where he began to take the first steps of an epic journey that would see him run 196 marathons in every one of the

world's 196 countries. Spending almost two years on the road and relying on the kindness of strangers to keep him moving, Nick's odyssey allowed him to travel slowly on foot, immersing himself in the diverse cultures and customs of his host nations. Running through capital cities and deserts, around islands and through spectacular landscapes, Nick dodges bullets in Guinea-Bissau, crosses battlefields in Syria, survives a wild dog attack in Tunisia, and runs around an erupting volcano in Guatemala. Along the way, he is often joined by local supporters and fellow runners, curious children, and bemused passers-by. Telling their stories alongside his own, Nick captures the unique spirit of each place he visits and forges a new relationship with the world around him. Running the World captures Nick's journey as he sets three world records and covers over five thousand miles. As he recounts his adventures, he shares his unique perspective on our glorious planet, celebrates the diversity of human experience, and reflects on the overwhelming power of running.

The Continental Drift Controversy Henry R. Frankel, 2012-04-26 Describes the expansion of the land-based paleomagnetic case for drifting continents and recounts the golden age of marine geoscience.

Running the Spiritual Path Roger D. Joslin, 2013-09-17 Running the Spiritual Path is Roger D. Joslin's compelling and inspiring guide to making running a spiritual sport. Imagine achieving physical fitness and spiritual growth simultaneously. Roger Joslin's step-by-step program is an engaging exploration of his conviction that spiritual well-being is as likely to happen while running along the trails of a favorite park as it is within the more traditional settings of neighborhood churches, synagogues, or mosques. Through awareness, chants, and visualization, and through attention to the most evident aspects of the present moment—the weather, pain, or breathing—the simple run can become the basis for a profound spiritual practice. In Running the Spiritual Path, Roger D. Joslin combines the insights gathered from thirty years of running with a personal spiritual journey that is guiding him to the priesthood. While drawing from and exhibiting an abiding respect for the traditions and sacred practices of the world's great religions, the author describes a heretofore unexplored method of sacred running, of bringing meditation and a prayerful communion to the running trail.

The Continental Drift Controversy: Volume 4, Evolution into Plate Tectonics Henry R. Frankel, 2012-04-26 The resolution of the sixty-year debate over continental drift, culminating in the triumph of plate tectonics, changed the very fabric of Earth science. This four-volume treatise on the continental drift controversy is the first complete history of the origin debate and gradual acceptance of this revolutionary theory. Based on extensive interviews, archival papers, and original works, Frankel weaves together the lives and work of the scientists involved, producing an accessible narrative for scientists and non-scientists alike. This fourth volume explains the discoveries in the mid-1960s which led to the rapid acceptance of seafloor spreading theory and how the birth of plate tectonics followed soon after, with the geometrification of geology. Although plate tectonics did not explain the cause or dynamic mechanism of drifting continents, it provided a convincing kinematic explanation that continues to inspire geodynamic research to the present day.
