**Foundations of Education: Instructional strategies for teaching children and youths with visual impairments** M. Cay Holbrook, Alan J. Koenig, 2000

**Early Childhood Education** Petr G. Grotewell, Yanus R. Burton, 2008 This book focuses on early childhood education which spans the human life from birth to age 8 Infants and toddlers experience life more holistically than any other age group Social emotional cognitive language and physical lessons are not learned separately by very young children Adults who are most helpful to young children interact in ways that understand that the child is learning from the whole experience not just that part of the experience to which the adult gives attention Although early childhood education does not have to occur in the absence of the parent or primary caregiver this

term is sometimes used to denote education by someone other than these the parent or primary caregiver Both research in the field and early childhood educators view the parents as an integral part of the early childhood education process Early childhood education takes many forms depending on the theoretical and educational beliefs of the educator or parent Other terms that is often used interchangeably with early childhood education are early childhood learning early care and early education Much of the first two years of life are spent in the creation of a child s first sense of self or the building of a first identity Because this is a crucial part of children s makeup how they first see themselves how they think they should function how they expect others to function in relation to them early care must ensure that in addition to carefully selected and trained caregivers links with family home culture and home language are a central part of program policy If care becomes a substitute for rather than a support of family children may develop a less than positive sense of who they are and where they come from because of their child care experience

**The Portfolio Book** Elizabeth F. Shores,Cathy Grace,1998 Presents the use of portfolio books to assess children s learning Provides ten easy to use steps that can be integrated into everyday teaching

**Taking Running Records** Mary Shea,2000 A teacher shares her experience on how to take running records and use what they tell you to assess and improve every child s reading

documentation in the multi modal age Includes new material and case studies that explores the essential elements of child observation across the world Research chapter re written to make it more accessible for all students More case studies throughout linking theory to practice *Children's Creative Inquiry in STEM* Karen Janette Murcia,Coral Campbell,Mathilda Marie Joubert,Sinead Wilson,2022-04-05 This edited volume brings together international research that explores children s creativity in STEM inquiry It takes the position that creativity is relevant in all aspects of life and is essential for adaptable and innovative thinking The research informed content of the book highlights both challenges and opportunities for growing children s creativity The book focuses on fostering children s creativity and natural curiosity in the world around them through STEM inquiry Through STEM inquiry children are learning through a cross disciplinary approach where they apply concepts from multiple fields as they are thinking creatively problem solving and constructing solutions Educators play a critical role in encouraging children s creativity by modelling creativity providing creative projects for children and importantly establishing rich culturally connected environments where children have the resources conditions and opportunities for acting and thinking creatively The book provides a lens for looking at children s creativity in a range of different cultural settings It offers insight and guidance to future research and will build educators capacity for developing children s creative practices *School Children and the War Series* United States. Office of Education,1943 Assessment of Young Children Lisa B. Fiore,2012-05-31 In an era of standards and norms where assessment tends to minimize or dismiss individual differences and results in punitive outcomes or no action at all Assessment of Young Children provides teachers with an approach to assessment that is in the best interest of both children and their families Author Lisa B Fiore explores a variety of ways to study and assess young children in their natural environments while stressing the importance of bringing children and families into the process This lively text helps the reader learn how to cultivate developmentally appropriate practice create appropriate expectations examine children s work interact in groups and improve their teacher behavior Accounts of real experiences from children families teachers and administrators provide on the ground models of assessment strategies and demonstrate how children are affected Assessment of Young Children explores both standardized and authentic assessment work sampling systems and observation skills Readers will walk away with strategies for communicating information about children and portfolio assessment and how the use of formal and informal methods of observation documentation and assessment are connected to teacher and student inquiry Assessment of Young Children encourages an assessment strategy where the child remains the focus and explores how collaboration with children families and colleagues creates an image not a diagnosis of the child that is empowering rather than constraining Special Features Include Case Study examples that anchor the concepts presented in the chapters and engage readers more deeply in the content Now what and Avenues for Inquiry throughout the book present students with concrete extensions of the material that they may pursue for further investigation *Observing Children and Families* Gill Butler,2025-02-28 This book explains the unique

insights that child observation can bring to practice with children and families and helps the reader develop their own skills in this approach. The ability to observe and to process what is seen is crucial in social work with children and families. Yet successive inquiries into child deaths have demonstrated the problems faced by professionals in doing what is superficially a very straightforward task: highlighting the difficulties in seeing, thinking about, and developing an understanding of the child's experience. This book helps readers to develop an understanding of what is entailed in observation, explaining the unique insights that child observation can bring to practice with children and families. By drawing out relevant theoretical concepts, it aids their understanding of what they are observing and so helps them to develop their own skills. Key theoretical concepts are brought together from developmental psychology and psychoanalytic thinking in a way that enables practitioners to draw on these to inform and enrich their thinking. Useful case studies are presented which practitioners can relate to their own practice when they are struggling to make sense of difficult situations.

School Services for Children of Working Mothers, 1943  
*Social and Emotional Prevention and Intervention Programming for Preschoolers* Susanne A. Denham, Rosemary Burton, 2012-12-06  
*Social and Emotional Prevention and Intervention Programming for Preschoolers* rests on the idea that young children under optimal circumstances develop substantial abilities in social and emotional domains by the time they enter school. These abilities contribute to their success and well-being during these early years but even more importantly to both their successful adaptation to school, personal and academic, and their long-term mental health. The chapters of this volume present theoretical foundations for and explanations of what important adults in young children's lives—preschool teachers, daycare providers, parents—can do to encourage the development of such social-emotional abilities, including promoting secure attachment relationships, providing positive behavior guidance, and assisting children in developing emotion knowledge, emotion regulation, social problem-solving skills, and other positive social behaviors. In addition, the book reviews the current state of early childhood programming in each of these crucial areas, with the addition of a chapter on emergent parent programming on emotion coaching. Recommendations are made for making such programming work for assessing individual children's development and program efficacy, and necessary future directions for this area are detailed.

Creating Curriculum in Early Childhood Julie Bullard, 2019-11-25  
*Creating Curriculum in Early Childhood* explores the backward design model of curriculum development, equipping readers with the tools and methods they need to effectively apply backward design in the early childhood classroom. Clear yet comprehensive chapters walk new and veteran educators through an effective method for curriculum design that promotes meeting standards through intentional teaching while engaging children in developmentally appropriate, interest-based education focused on big ideas and conceptual understanding. Featuring desired results, assessment methods, and teaching techniques specific to birth to age eight, this critical guide also includes practical tips for educators new to the method. Designed to help students and practitioners alike, this powerful textbook combines early childhood philosophy and developmental research with highly practical descriptions.
