Rural Europe Identity And Change:

Rural Europe Keith Hoggart, Henry Buller, Richard Black, 1995 This book examines the interaction at national and international level of the economic political and social change processes within Europe that are bringing about fundamental transformations in rural areas Although such changes are experienced at a local level they are heavily imbued with a national tone given that European nations possess distinctive visions of their rural areas These rural identities set limits within which economic political and social agents can act Yet these limits are constantly being subjected to strain particularly with the globalization of economic activity and the strengthening impetus for integrated EC policies

Interpreting Rurality Gary Bosworth, Peter Somerville, 2013-10-15 The British countryside is a national institution most people aspire to live there many people use it for leisure and recreation and we can all watch rural life played out on our television screen read about it in novels or consume its imagery in art and cinematography The aim of this book is to explore the way that these aspirations and perceptions influence the way that the term rural is interpreted across different academic disciplines Definitions of rural are not exact leaving room for these interpretations to have a significant impact on the meanings conveyed in different areas of research and across different economic social and spatial contexts In this book contributors present research across a range of subjects allowing critical reflections upon their personal and disciplinary interpretations of rural This resulting volume is a collection of diverse chapters that gives an emergent sense of how the notion of rural changes and blurs as the disciplinary lens is adjusted In drawing together these strands it becomes clear that human relations with rural space morph materiality into highly complex representations wherein both disadvantage and social exclusion persist within a rurality that is also commodified consumed and cherished

Local Responses to Global Integration Charlampos Kasimis, Apostolos G. Papadopoulos, 2018-12-20 First published in 1999 this volume features articles from 19 contributors on local responses to global integration with a focus on rural areas and their adoption of new functions as both producers and consumers It responds to a crisis in the regulatory framework and reconsiders globality revealing new forms of production and consumption developing in diverse ways amongst these global rural communities Authors from Australia Bulgaria Finland Greece Ireland the Netherlands Poland Sweden the United Kingdom and Venezuela are represented

Gender and Rural Geography Jo Little, 2017-09-29 Gender and Rural Geography explores the relationship between gender and rurality Feminist theory gender relations and sexuality have all

become central concerns of geographical research and significant progress has been made in terms of our understanding of both the broad relationship between gender and geography and the more detailed differences in the lives of men and women over space. The development of feminist perspectives and the study of gender relations in geography has however been fairly uneven over the discipline. Both theoretical and empirical work on gender has tended to be concentrated within social and cultural geography. Moreover, it has been directed largely towards the urban sphere.

Second Homes Nick Gallent, Alan Mace, M Tewdwr-Jones, 2017-03-02. Second homes are once again a source of political and social contention in rural areas. The British government's decision to reduce Council Tax discounts on second homes in England in April 2004 has caused wide debate in local communities, local authorities and the media. The debate has not only focused on the vexed Council Tax issue but on wider rural housing concerns. Questions have been raised as to whether second homes are a major cause of housing affordability problems in rural areas and whether they lead to the displacement of local people in rural communities. In the face of anecdotal evidence being presented to answer these questions, *Second Homes: European Perspectives and UK Policies* offers a more comprehensive analysis of the second homes question as it now exists. This up-to-date and authoritative analysis of second homes draws on the latest research and offers a critical insight into current housing problems in rural communities. Those interested in rural and housing studies will find the book valuable.

New Directions in Rural Tourism Lesley Roberts, Derek Hall, Mitchell Morag, 2017-03-02. Although there has been an increasing interest in rural tourism in terms of research, training and teaching in recent years, its conceptualization and the relationships between concept and strategy are still poorly represented and not well understood. The need for such a critical understanding is particularly crucial as rural areas experience rapid change and as tourism is viewed as a key element of development and regeneration. This volume provides an interdisciplinary approach to new directions in rural tourism, drawing on the latest conceptual thinking and evolving strategic roles. It brings together case study exemplification from the UK, Denmark, Norway, Austria, Spain, Slovenia, Poland, New Zealand and the Caribbean. It debates such key issues as sustainability and niche marketing. The book thus provides accessible material drawn from a range of environmental and cultural contexts and focuses attention on the nature and interrelationships between local and global issues in rural tourism and development.

Revival: Community Development on the North Atlantic Margin (2001) John Hutson, Reginald Byron, 2017-07-12. This title was first published in 2001. Isolated communities dependent upon fishing, farming and forestry which are scattered around the North Atlantic coast have shared a disastrous decline during the last decade. These communities are in the peripheries of advanced industrial nation states such as Canada and supra-national alliances such as the European Community, yet despite this there are no easy solutions to the development of these regions. This volume argues that the productive assets of these regions and how they can be used to sustain household incomes need to be better understood. The assets need to be converted into products and services and they need to be marketed profitably. The diminishing flow of young people who leave these areas to

obtain higher education and who do not return must be turned around and efforts must be concentrated on the creation or strengthening of economic conditions which satisfy the younger generation's employment aspirations consumer requirements and social needs **Environmental Problems in East-Central Europe** Frank Carter, David

Turnock, 2002-09-26 In this new edition the progress made in the last decade to solve the environmental problems described in the first edition is assessed The attempts to bring environmental legislation into line with West European norms is also described Environmental Problems of East Central Europe looks at air and water pollution modern farming water supplies waste management and landscape protection These topics are placed within economic social and political profiles as spending on a clean environment must be reconciled with welfare spending and the safeguarding of jobs European Union assistance civil society and the work of environmental NGOs are also discussed All of these matters are considered within the context of the wider geographical area and then by each individual country including the previously communist states lying to the west of the Soviet Union now with the former federal states of Czechoslovakia and Yugoslavia broken up into seven different entities and a review of the former Soviet Union with particular reference to the Baltic States Environmental Problems in East Central Europe provides a wealth of up to date reference material with a vast amount of supporting literature on environmental conditions and the functioning of civil society and a map of each country The environment is being taken seriously by them all such is the influence of the Rio sustainability agenda in general and the EU environmental acquis in particular The book reveals that Eastern Europe is not a blighted area but in some respects has a higher biodiversity than Western Europe Although there is enormous waste and inefficiency in energy use people actually consume relatively little and the East therefore has some lessons for the West in terms of managing on the basis of fair share of the earth's resources *A Contrived Countryside* Keith Hoggart, 2021-03-26 This book shows how governance regimes before the 1970s suppressed rural prospects of housing improvement and created conditions for middle class capture Using original archival sources to reveal the intricacies of local and national policy processes weak rural housing performances are shown to owe more to national governance regimes than local under performance Looking behind the scenes at policy processes highlights neglected principles in national governance and shows how investigating rural housing is fundamental to understanding the national scene With original insights and a new analytical perspective this volume offers evidence and conclusions that challenge mainstream assumptions in public policy housing rural studies and planning *Voices from the North* Jan Ohman, 2018-05-08 While contemporary human geography has widely acknowledged that knowledge has both contingent and contextual character international literature has tended to blot out differences and reproduce hegemonic Anglo Saxon discourses Any interest in destabilizing such power knowledge systems calls upon interventions from other voices Nordic voices in particular have not been well represented in current human geography This book redresses the balance by offering a unique assessment of the geographical research being undertaken in the Nordic countries and by

demonstrating the way in which these voices contribute to international debate It brings together a range of Nordic authors each of whom has made a significant contribution to such debates and considers the relationship between production and social institutions in local development It also examines the ambiguous role of the welfare state in the Nordic countries issues of social practice and identity and their relationship to spatiality new approaches to landscape and environment and the significance of difference and relations of power Theoretical discussion illustrated by empirical examples reveals the interweaving in Nordic human geography of international affiliations and Nordic situatedness *Sustainable Development of the North Atlantic Margin* Reginald Byron,James Walsh,Proinnsias Breathnach,2019-01-22 First published in 1997 this timely collection of papers takes an interdisciplinary approach to examining sustainable development in a wide range of countries such as Ireland Norway and Wales on the North Atlantic Margin It features specialists in geography social anthropology tourism sociology regional studies business municipality studies health policy and the rural economy The contributors argue that a free marketplace and natural resource sustainability are not always incompatible for green policies to be successful

Agriculture in Mediterranean Europe Dionisio Ortiz Miranda,Eladio Vicente Arnalte Alegre,Ana Maria Moragues Faus,2013-06-25 This volume illustrates and deepens the understanding of current agrarian dynamics developing in Mediterranean countries in the light of recent theoretical contributions The book compiles and analyses a set of Mediterranean case studies that show the range of transformations shaping contemporary agriculture in Southern Europe

The Geography of Rural Change Brian W. Ilbery,2014-09-11 The Geography of Rural Change provides a thorough examination of the processes and outcomes of rural change as a result of a period of major restructuring in developed market economies After outlining the main dimensions of rural change the book progresses from a discussion of theoretical insights into rural restructuring to a consideration of both the extensive use of rural land and the changing nature of rural economy and society The text places an emphasis on relevant principles concepts and theories of rural change and these are supported by extensive case study evidence drawn from different parts of the developed world The Geography of Rural Change is written for undergraduates taking courses in human geography agricultural geography rural geography rural sociology planning and agricultural economics
