Engineering of Microorganisms for the Production of Chemicals and Biofuels from Renewable Resources Guillermo Gosset, 2017-01-26 This book reviews state of the art regarding strategies for generating and improving microbial strains designed for utilizing renewable raw materials It discusses methods for genetically engineering of thermophilic bacteria *Saccharomyces cerevisiae* *Escherichia coli* and *Zymomonas mobilis* as well as approaches for obtaining useful products from these renewable raw materials based on biotechnological processes using microbes to chemically transform them However the efficient transformation of

lignocellulosic biomass or glycerol to useful products represents a major challenge Biomass has to be treated physically and chemically to release a mixture of sugars that potentially can be employed by the microbial production strains These hydrolytic treatments result in diverse toxic compounds being generated and released that negatively impact strain performance Furthermore most of the commonly used industrial microbes do not have the natural capacity to efficiently utilize and transform the generated sugar mixtures or glycerol The microbial species reviewed in this book possess particular advantages as production strains and are currently employed for the synthesis of numerous biofuels and chemicals The book reviews the general and strain specific genetic engineering strategies for the improvement of sugar mixtures and glycerol catabolism The issue of lignocellulosic hydrolysate toxicity is addressed in several chapters where genetic engineering and adaptive laboratory evolution strategies are reviewed and discussed The objective of this book is to provide the current knowledge regarding strategies for the generation and improvement of microbial strains designed for the transformation of renewable raw materials into useful products This book aims to become a reference for researchers and students working in this field

The Monetization of Technical Data Daniel Trauth, Thomas Bergs, Wolfgang Prinz, 2023-01-01 The monetization of data is a very young topic for which there are only very few case studies There is a lack of strategy or concept that shows decision makers the way into the monetization of data especially those who have discovered or are threatened by the digital transformation or Industry 4.0 Because machine data is usually

unstructured and not usable without domain knowledge metadata the monetization of machine data has an as yet unquantifiable potential In order to make this potential tangible this work describes not only contributions from science but also practical examples from industry Based on different examples from various industries the reader can already become part of a future data economy today Values and benefits are described in detail The translation was done with the help of artificial intelligence A subsequent human revision was done primarily in terms of content

Things and Thingness in European Literature and Visual Art, 700-1600 Jutta Eming, Kathryn Starkey, 2021-12-06 The eleven chapters in this international volume draw on a variety of theoretical and methodological approaches to focus our attention on medieval and early modern things ca 700 1600 The range of things includes actual objects the Altenburg Crucifixion a copy of Hieronymus Brunschwig's *Liber de arte distillandi a pilgrim's letter* imagined objects a prayed cloak for the Virgin Mary and narrative objects in texts the Alliterative *Morte Arthure* the *Ordene de Chevalerie* Hartmann von Aue's *Erec* Heinrich of Neustadt's *Apollonius of Tyre* Lu's *de Cam'es* *Os Lusadas* and the *vita* of Saint Guthlac Each in its own way the papers consider how things do what they do in texts and art often foregrounding the intersection between the material and the immaterial by exploring such questions as how things act how they express power and how texts and images represent them Medieval and early modern things are repeatedly shown to be more than symbolic or passive they are agentive and determinative in both their intra and extradiegetic worlds The things that are addressed in this volume are varied and are embedded or entangled in different contexts and societies and yet they share a concerted engagement in human life
