Samhs Forms For 2016:

South Africa's Post-Apartheid Military Lindy Heinecken, 2020-01-01 This timely book examines how the South African National Defence Force has adapted to the country's new security political and social environment since 1994. In South Africa's changed political state, how has civilian control of the military been implemented and what does this mean for defence in a democracy? This book presents an overview of the security environment, how the mission focus of the military has changed and the implications for force procurement, force preparation, force employment and force sustainability. The author addresses other issues such as the effect of integrating former revolutionary soldiers into a professional armed force, the effect of affirmative action on meritocracy, recruitment and retention, military veterans looking at the difficulties they face in reintegrating back into society and finding gainful employment, gender equality and mainstreaming, the rise of military unions and why a confrontational instead of a more corporatist approach to labour relations has emerged, HIV/AIDS and the consequences this holds for the military in terms of its operational effectiveness. In closing, the author highlights key events that have caused the SANDF to become lost in transition and transformation, spelling out some lessons learned. The conclusions she draws are pertinent for the future of defence security and civil-military relations of countries around the world.

Detecting Malinger and Deception Harold V. Hall, Joseph Poirier, 2020-06-03 *Detecting Malinger and Deception: Forensic Distortion Analysis (FDA) 5 Third Edition* maintains the tradition of the prior two editions, following the Forensic Distortion Analysis (FDA) model. Fully updated since the last edition nearly 20 years ago, the book continues to serve as a comprehensive volume on deception and distortion in forensic, clinical and several specialized contexts. As with the previous editions, the book presents a model of deception intended to be utilized and applied by the qualified evaluator. The proposed model covers targets of the faking response, styles shown and methods to detect the deception. The goal is to summarize the historical and latest information on distortion detection to present guidelines for detecting deception that include variable accuracy rates based on different detection techniques and to stimulate further research of effective methods of deception detection. Recommendations and guidelines for the practicing clinician are offered throughout the book, including real-world cases to inform and enlighten, particularly in unique cases or those in which the certain outcomes are unexpected. Key Features: Outlines the role of the forensic professional in applying and integrating methods assessment in deception and distortion. Provides base rates for deception-related behavior and events, especially useful in report writing or courtroom testimony as an expert witness. Presents the latest advances in methodology and technology to assist in the search for ground truth in applied settings and situations. Applies forensic distortion analysis to evaluate the deception-related findings and statements of other professionals involved in a particular case. New coverage includes sections on deception analysis for collectivities including media groups, contemporary politics, cross-national corporations, conflict and terrorism. *Detecting Malinger and Deception* incorporates the latest research, providing practical application to utilize information

and evaluative methods as they pertain to deception related settings and situations Sample reports and extensive graphs tables charts and histograms are provided and every chapter has been updated with new studies and investigations The Third Edition boasts several new chapters and updated working appendices of coverage to expand the exploration of deception addressing advances in the field and our current understanding of the phenomenon **Annual Report** South Africa. Department of Defence,2016 **Rationalist Bias in Communication Theory** Shedletsky, Leonard,2021-06-04 While communication theory has not recognized the implications of the social intuitionist model psychologists have gathered an impressive body of evidence to support the theory In social cognition research there was the idea that human inferential processes are conscious rational logical and accurate and this belief continues somewhat in the behavioral sciences although there is evidence that it is incorrect A fresh examination is needed on just how these inferences by the receiver and the implications by the sender carried out at high speed impact our understanding of the communication process Simply put until now the default case in communication theory is the belief that we consciously reason and then we act However that may not be entirely true Rationalist Bias in Communication Theory applies social intuition theory to human communication This book explores how research has missed accounting for a critical fact about human communication in the theories of communication namely that we as humans can respond to one another and to all kinds of stimuli faster than we can deliberate By applying intuitive cognition to communication a new light can be shed on the communication process which is what the chapters prove and discuss This book is valuable for social scientists practitioners researchers academicians and students interested in new theories in communication theory **Annual Report** Armaments Corporation of South Africa Ltd,2016
