prestigious Nuclear Program instead he accepts even though it's not his first choice. He initiates his new job and decides to simultaneously study for the next ISRO exam, quickly learning that this is no ordinary job either. It requires him to complete a one-year stringent training program in Nuclear Science Engineering at its Academy, learning the most complex and cutting-edge technologies of Nuclear Fission. The further he moves, the more he understands the price of achieving a dream career. When he begins to develop feelings for one of his colleagues, he discovers the politics and groupism of the Academy. He finds himself cornered by the corruption of the system. Ashwin must decide whether he is willing to risk his sanity and achievements, risking his high-end career in the Nuclear program for the illustrious career he has always dreamed of. This path he chose led him to make choices that pushed his career to the verge of termination. What actions and determination brought an academically poor boy into the Nuclear Program of the World's Largest Democracy? What concoction of passion, stubbornness, and ego then brought him to the verge of unemployment? A Rogue Scientist: The Boy Who Did Not Sign through its inspirational yet twisted tale gives you the experience of that journey to pursue a goal with an incomprehensible degree of passion.

Hope in Hell Jonathon Porritt, 2021-04-06 A book for facing head-on and averting the oncoming global climate change disaster by inspiring people to move from general concern and passive support to active protagonists for change. Climate change is our era's defining issue. We know beyond reasonable doubt that climate change is accelerating. To face a challenge greater than humanity has ever seen before, we must also accelerate ourselves by summoning a sense of urgency, courage, and shared effort to match it. Jonathan Porritt's *Hope in Hell* is meant to do just that: by confronting the issue directly and strongly but also with inspiration and hope, it's not too late to avoid the worst consequences of climate change. Ultimately optimistic despite the dire challenge presented to the world, Porritt explores current science and new technologies, mobilization of younger people and political action, and encouraging intergenerational solidarity as older generations learn their own responsibilities in creating a better world for their successors.

Portrait of a Lady AA. VV., 2015-02-23T00:00:00+01:00 Which factors prevent a larger female participation in the scientific and research careers? This book analyzes recent data and figures about women researchers in R & D and Higher Education institutions, their motivations, the reasons and causes determining the still persisting gender gap. The various scholars suggest possible strategies for obtaining a better gender balance in the scientific systems and highlight policy measures for institutions to ease the participation of women in science research and technology studies and careers. The final aim is to contribute to change the scientific gender bias paradigm into cooperation between genders in science and to involve in reflection and subsequent actions not only women but the scientific community at large, institutions, national and European political bodies concerned in research and science policy. Sveva Avveduto is research director at the Institute for Research on Population and Social Policies of the Italian National Research Council. Her main research interests concern science and education policy and science and society issues. She is the leader of CNR IRPPS research activities in SMART RESPECT and EVIDENCE.
