Constructing "race" and "ethnicity" in America Dvora Yanow,2002-11-07

What do we mean in the U S today when we use the terms race and ethnicity

What do we mean and what do we understand when we use the five standard race ethnic categories

White Black Asian Native American and Hispanic

Most federal and state data collection agencies use these terms without explicit attention and thereby create categories of American ethnicity for political purposes

Dvora Yanow argues that race and ethnicity are socially constructed concepts not objective scientifically grounded variables and do not accurately represent the real world

She joins the growing critique of the unreflective use of race and ethnicity in American policymaking through an exploration of how these terms are used in everyday practices

Her book is filled with current examples and analyses from a wealth of social institutions health care education criminal justice and government at all levels

The questions she raises for society and public policy are endless

Yanow maintains that these issues must be addressed explicitly publicly and nationally if we are to make our policy and administrative institutions operate more effectively
