Cohen, 2025 Entomophagy the eating of insects is an ancient practice that is still common in many parts of the world One of the best known examples is in Oaxaca where grasshoppers known as chapulines are harvested in summer and fall toasted and enjoyed year round As Oaxaca has become a popular destination for tourists especially food tourists the consumption and market for chapulines has evolved Jeff Cohen's manuscript argues that understanding chapulines requires seeing them as a food source a cultural symbol and an economic engine Part I Approaching Chapulines introduces the women at the heart of this study and documents how they harvest prepare and consume grasshoppers Part II Eating and Thinking Chapulines moves to how other people consume chapulines For many Oaxacans especially those in the Central Valleys chapulines are a regular part of the diet a food that is highly anticipated every year as discussed in chapter three Chapter four documents how tourists approach chapulines Those who try chapulines are usually looking for an experience something to connect them with the real Oaxaca rather than a meal Part III Marketing Chapulines follows the women whom Cohen calls chapulineras as they carry chapulines to the marketplace As with markets everywhere COVID 19 was a massive disruption but the chapulineras created a touchless economy that allowed for continued production even as markets closed and most communities isolated in place If tourists see chapulineras as poor rural Indigenous women who are struggling to make ends meet these chapters contradict that assumption and reveal the entrepreneurial energy that they bring to the marketplace A conclusion expands on the text to consider the broader world of food studies and asks why anyone would eat a bug *Integrating Literature in the Disciplines* Sharon Kane, 2020-04-22 The Second Edition of this practical and comprehensive resource offers a multitude of ways to incorporate literature into teaching and learning across a range of disciplines Future and practicing teachers librarians instructional coaches and school leaders can implement the ideas within this text to improve the literacy skills and knowledge of students while also addressing standards and curricular goals of various content areas The new edition recognizes a paradigm shift from content areas to disciplines reflecting the specific ways reading and writing are used in different fields of study Updated with current research and practices the volume recommends and evaluates books in different genres and categories with chapters on informational books fiction biography and memoir poetry and hands on and how to books For every category Kane provides a rationale instructional strategies and author studies as well as lists and descriptions of books related to curricular areas With a wealth of activities and new BookTalks this Second Edition is greatly revised and features expanded attention to technology

Inequality Timothy A. Kohler, Michael E. Smith, 2019-02-19 Is wealth inequality a universal feature of human societies or did early peoples live an egalitarian existence How did inequality develop before the modern era Did inequalities in wealth increase as people settled into a way of life dominated by farming and herding Why in general do such disparities increase and how recent are the high levels of wealth inequality now experienced in many developed nations How can archaeologists tell *Ten Thousand Years of Inequality* addresses these and other questions by presenting the first set of consistent quantitative measurements of ancient wealth inequality The authors are archaeologists who have adapted the Gini index a statistical measure of wealth distribution often used by economists to measure contemporary inequality and applied it to

house size distributions over time and around the world Clear descriptions of methods and assumptions serve as a model for other archaeologists and historians who want to document past patterns of wealth disparity The chapters cover a variety of ancient cases including early hunter gatherers farmer villages and agrarian states and empires The final chapter synthesizes and compares the results Among the new and notable outcomes the authors report a systematic difference between higher levels of inequality in ancient Old World societies and lower levels in their New World counterparts For the first time archaeology allows humanity s deep past to provide an account of the early manifestations of wealth inequality around the world Contributors Nicholas Ames Alleen Betzenhauser Amy Bogaard Samuel Bowles Meredith S Chesson Abhijit Dandekar Timothy J Dennehy Robert D Drennan Laura J Ellyson Deniz Enverova Ronald K Faulseit Gary M Feinman Mattia Fochesato Thomas A Foor Vishwas D Gogte Timothy A Kohler Ian Kuijt Chapurukha M Kusimba Mary Margaret Murphy Linda M Nicholas Rahul C Oka Matthew Pailes Christian E Peterson Anna Marie Prentiss Michael E Smith Elizabeth C Stone Amy Styring Jade Whitlam *Protected landscapes and wild biodiversity* Nigel Dudley, 2012
