2012 GCSE English results Great Britain: Parliament: House of Commons: Education Committee, 2013-06-11 The 2012 GCSE English results prompted significant controversy which ultimately resulted in an application for judicial review This report sets out the background to these events and identifies lessons to be learned The problems with GCSE English can be traced back to the 2007/09 development phase of the qualification in particular the turbulence which resulted from the shift away from a mostly linear to a modular system combined with a high proportion of controlled assessment and generous marking tolerances Exam board experts raised concerns at the time but these were not acted upon by the regulator the then interim Ofqual Further difficulties arose because of pressures from the school accountability system The problems experienced with GCSE English in 2012 highlighted serious weaknesses in the moderation of speaking and listening with consequences for grade awarding The current status of Ofqual as an independent regulator accountable to Parliament is the right one However the Coalition Government is bringing in wholesale changes to GCSEs and A levels to a tight timetable and at the same time Ofqual must have systems in place The Committee is also concerned that there is a rush towards separate exam systems for England Wales and Northern Ireland without careful reflection on what might be lost or consensus that this is the right thing to do

Echinoderms: biology, ecology and exploitation Libin Zhang, Annie Mercier, Jun Ding, Chenghua Li, Marie Antonette Juinio-Meñez, 2023-06-08 *Mitochondria in Health and Disease* Paolo Bernardi, Orian S. Shirihai, 2021-09-01 Mitochondrial biology reinvented itself and became a new world that has attracted new scientists influencing every field of biomedical research Mitochondrial research is growing and changing as reflected by the exponential rise in the number of conferences covering mitochondrial biology and the role of mitochondria in diseases ranging from neurodegenerative diseases metabolic diseases and genetic muscular dystrophies to immunopathologies and cancer As the awareness of the essential role of mitochondria in pathology rose a demand for new approaches to measure mitochondrial function resulted in the robust development of new forms of microscopy and spectroscopy that opened windows into previously unknown aspects of mitochondrial biology Two Conferences provided an outstanding representation of this state of affairs the Gordon Research Conference Mitochondrial Dynamics and Signaling Ventura California March 17-22 2019 and the FASEB Conference Mitochondrial Biogenesis and Dynamics in Health and Disease Palm Springs California May 19-24 2019 These conferences well reflected the explosion of the field of mitochondrial communication within the cell between cells and across organs as well as the budding of a new field on the definition of individual mitochondria and the identification of subtypes with diverse structural features that may serve different specific functions Through our participation in these meetings we conceived the idea to cover some of these topics in the Research

Topic Mitochondria in Health and Disease of Frontiers in Physiology Mitochondrial Research Specialty Section Fitting the tradition of Frontiers our contributors have generated a platform including both solid data and new concepts as radical and courageous as they can be We are pleased with the outcome and we hope that our readers will share our enthusiasm

Creating Supportive Spaces for Pregnant and Parenting College Students Catherine L. Riley, Katie B. Garner, 2023-12-01 This volume brings together interdisciplinary research, theoretical perspectives, and detailed explanations of examples to help colleges become supportive spaces for pregnant and parenting students. Expanding the discourse around pregnant and parenting college students to a more interdisciplinary and international arena, this volume follows the ground-breaking monograph *Title IX and the Protection of Pregnant and Parenting College Students* by Riley Hutchinson Dix (2022). The present volume defines this cohesive field and brings together separate voices to help colleges become supportive spaces. The chapters explore academia's attitude toward motherhood, families, and carework; the invisibility of pregnant and parenting students; system-wide negligence; the forgotten nature of student fathers; unacknowledged miscarriages; organized policy change efforts; involved agencies of change; the troubling presence of coercion; and more. While arguing that barriers currently prevent colleges from becoming supportive spaces, the volume asserts that improvements are both feasible and vital for ensuring that institutions of higher education are complying with Title IX, a U.S. federal law. Offering interdisciplinary research, explanations of problems, and paths for progress, this edited volume will be useful to scholars, researchers, administrators, and activists working to support pregnant and parenting students. Various chapters will also interest those working in higher education administration, education policy, reproductive health, gender studies, and health and organizational communication more broadly. Supporting pregnant and parenting college students, however, is a shared responsibility belonging to all members of a campus community. Accordingly, this volume is for every institution that plans to comply with Title IX.

Green Photo-active Nanomaterials Nurxat Nuraje, Ramazan Asmatulu, Guido Mul, 2015-11-06 Providing up-to-date coverage of green nanomaterials and systems, this book provides comprehensive information on nanostructured materials, including their applications in energy and environmental sciences. The book focuses on photo-active nanostructured materials, from the basic understanding of solar energy activation to their sustainable preparation and applications in environmental remediation and fuel production from biomass and carbon dioxide. It also examines the health and environmental impacts of photo-catalyst nanomaterials. This book is an important reference for researchers and industrial chemists working in the fields of energy and environmental remediation.

Big Data on Real-World Applications Sebastian Ventura Soto, José Luna, Alberto Cano, 2016-07-20 As technology advances, high volumes of valuable data are generated day by day in modern organizations. The management of such huge volumes of data has become a priority in these organizations, requiring new techniques for data management and data analysis in Big Data environments. These environments encompass many different fields, including medicine, education, data, and recommender systems. The aim of this book is to provide the reader with a variety of fields and systems where the analysis and management

of Big Data are essential This book describes the importance of the Big Data era and how existing information systems are required to be adapted to face up the problems derived from the management of massive datasets **Systems**

Orthodontics Pietro Auconi, Guido Caldarelli, Antonella Polimeni, 2024-09-16 This book marks one of the first applications of the Medicine Network discipline to an everyday scenario It explores situations where patients often in adolescence grapple with the decision of whether to commence a treatment seeking insights into the more plausible future scenarios Additionally the specific feedback from biological systems in the human body serves as a potent metaphor for addressing various challenges in the field of Complex Systems In recent times systems thinking and complexity theory have yielded substantial conceptual advancements across various research domains In the context of orthodontics these approaches offer a more comprehensive understanding in contrast to the traditional mechanistic approach which primarily focuses on the analysis of applied forces Systems thinking directs attention to the interaction among dentoskeletal components where the behavior of one element can influence others The amalgamation of multiple elements leads to entities with properties distinct from those of individual components The increasing complexity of orthodontic reality beyond clinical or radiological observations necessitates the development of new theories Complexity theory has demonstrated that emergent properties in biological systems can be discerned through appropriate computational models as opposed to the analytical study of individual components The central metaphor for the interactive craniofacial system during growth is portrayed by the facial topology revealed through network analysis facilitating a systemic reevaluation of traditional orthodontic theories This book delineates the novel insights derived from the clinical computational approach applicable for a prognostic and early interception perspective in managing dentofacial dysmorphoses Its objective is to captivate practitioners and persuade them of the practical utility of these innovative approaches *Imaging and Mechanism of Leukocyte Recruitment and Function in Inflammation and Infections* Zhichao Fan, Yuqing Huo, Hao Sun, Xunbin Wei, 2021-07-05 **Gender** Linda

Rights as Weapons Clifford Bob, 2019-04-16 An in depth look at the historic and strategic deployment of rights in political conflicts throughout the world Rights are usually viewed as defensive concepts representing mankind s highest aspirations to protect the vulnerable and uplift the downtrodden But since the Enlightenment political combatants have also used rights belligerently to batter despised communities demolish existing institutions and smash opposing ideas Delving into a range of historical and contemporary conflicts from all areas of the globe *Rights as Weapons* focuses on the underexamined ways in which the powerful wield rights as aggressive weapons against the weak Clifford Bob looks at how political forces use rights as rallying cries naturalizing novel claims as rights inherent in humanity absolutizing them as trumps over rival interests or community concerns universalizing them as transcultural and transhistorical and depoliticizing them as concepts beyond debate He shows how powerful proponents employ rights as camouflage to cover ulterior motives as crowbars to break rival coalitions as blockades to suppress subordinate groups as spears to puncture discrete policies and as dynamite to explode whole societies And he demonstrates how the targets of rights campaigns repulse such assaults using their own rights like weapons denying the abuses they are accused of constructing rival rights to protect themselves portraying themselves as victims

rather than violators and repudiating authoritative decisions against them This sophisticated framework is applied to a diverse range of examples including nineteenth century voting rights movements the American civil rights movement nationalist populist and religious movements in today s Europe and internationalized conflicts related to Palestinian self determination animal rights gay rights and transgender rights Comparing key episodes in the deployment of rights Rights as Weapons opens new perspectives on an idea that is central to legal and political conflicts
