Comparative Capitalism

Magnus Feldmann,2025-02-20 How do capitalist institutions vary across countries and regions How is capitalist diversity related to political and social factors like inequality representation and political systems How do capitalist institutions shape economic outcomes Comparative Capitalism takes a global approach to capitalist diversity It considers not only liberal and coordinated market economies in the Global North but also other varieties such as networked hierarchical dependent and statist market economies in other parts of the world It examines new models such as growth regimes and growth models and key trends such as the growing significance of finance and the rise of populism in the 21st century Case studies are drawn from both the Global North and South including East Central Europe East Asia Latin America and the BRICS economies to highlight both domestic institutions and the role of economic integration on a global scale Including tables and overviews of key features of each model Comparative Capitalism is essential reading for students of international and comparative political economy international development and business government relations *Alternative Approaches to Economic Theory* Victor A. Beker,2019-06-11 The 2007 2008 financial crisis exposed the shortcomings of mainstream economic theory with economists unprepared to deal with it In the face of this a major rethinking of economics seems necessary and in presenting alternative approaches to economic theory this book contributes to the rebuilding of the discipline This volume brings together contributions from different perspectives and theoretical approaches that address the challenge of updating the economic theory corpus and seek to recover prestige for this discipline after the failure of neoclassical economics It addresses a range of topics including the complexity approach to economics category theory the Post Keynesian approach to micro and macroeconomics financialisation multidimensional analysis and ecological economics The book is aimed at economics scholars researchers academics and practitioners as well as upper undergraduates and graduates in this area of knowledge It may also be of interest for people interested in methodological issues in economics and the relationship between economic theory and the real world **Contemporary Issues in African Administration and Development Politics** ,1990 **Ideals And Realities: Selected Essays Of Abdus Salam (2nd Edition)** Choy Heng Lai,1987-04-01 The book is a collection of new materials on some representative non technical writings of Professor Abdus Salam The essays touch on many different themes in particular the social and economic dimensions of science Difficulties faced by scientists in developing countries and their solutions are also given some insightful analysis Topic of particular interest is Professor Salam's view on the development and the international nature of science His insistence that a scientific thought and its creation is the common and shared heritage of mankind which deserves much thought There are also interesting accounts of Professor Salam himself and of the International Centre for Theoretical Physics at Trieste Italy *Complexity Economics for Environmental Governance* Jean-François Mercure,2022-11-17 This book redesigns environmental governance for a sustainability transition helping academics and decision makers truly understand the socio economic impacts of policy *Universities as Living Labs for Sustainable Development* Walter Leal Filho,Amanda Lange Salvia,Rudi W.

Pretorius, Luciana Londero Brandli, Evangelos Manolas, Fatima Alves, Ulisses Azeiteiro, Judy Rogers, Chris Shiel, Armin da Do Paco, 2019-04-30 This book fills an important gap in the literature and presents contributions from scientists and researchers working in the field of sustainable development who have engaged in dynamic approaches to implementing sustainability in higher education. It is widely known that universities are key players in terms of the implementation and further development of sustainability, with some having the potential of acting as living labs in this rapidly growing field. Yet there are virtually no publications that explore the living labs concept as it relates to sustainability and in an integrated manner. The aims of this book, which is an outcome of the 4th World Symposium on Sustainable Development at Universities WSSD U 2018 held in Malaysia in 2018, are as follows: i) to document the experiences of universities from all around the world in curriculum innovation, research activities and practical projects as they relate to sustainable development at the university level; ii) to disseminate information, ideas and experiences acquired in the execution of projects, including successful initiatives and good practice; iii) to introduce and discuss methodological approaches and projects that seek to integrate the topic of sustainable development in the curricula of universities; and iv) to promote the scalability of existing and future models from universities as living labs for sustainable development. The papers are innovative, cross-cutting and many reflect practice-based experiences, some of which may be replicable elsewhere. Also, this book, prepared by the Inter University Sustainable Development Research Programme IUSDRP and the World Sustainable Development Research and Transfer Centre WSDRTC, reinforces the role played by universities as living labs for sustainable development.
