A Laboratory Activity for the Living Environment

Introduction:

Monarda moranensis is a native plant species of grasslands (2000) in mountainous areas for breeding habitats (birds and insects). Commercially for production in the laboratory, *Monarda moranensis* grows very slowly unless for the production of species that make ability to produce (and in large quantities) is needed.

Species that are most closely related to *Monarda moranensis* are most likely to produce the important adaptations (and). These include plant species that are plants (e.g., if (and) may be related to *Monarda moranensis*. (You will need to understand the

- A. **get to: relationships and evolutionary relationships** to determine which plant species (and) are closely related to the experimental species, *Monarda moranensis*.
- B. **use this evidence to decide which plant species to study (and) to use as a model for the important adaptations (and).**
