

A man with short dark hair and a light beard is sitting on a wooden bridge railing. He is wearing a dark blue button-down shirt and dark pants. The background shows a body of water, green trees, and a white railing with black lanterns. A quote is overlaid on the left side of the image.

"Using this technology, some forms of blindness may be curable, including macular degeneration and Stargardt disease, a currently untreatable form of eye disease that causes blindness in teenagers and young adults."

Robert Lanza Biocentrismo:

Beyond Biocentrism Robert Lanza, Bob Berman, 2016-05-03 Biocentrism shocked the world with a radical rethinking of the nature of reality But that was just the beginning In *Beyond Biocentrism* acclaimed biologist Robert Lanza one of TIME Magazine's 100 Most Influential People in 2014 and leading astronomer Bob Berman take the reader on an intellectual thrill ride as they re-examine everything we thought we knew about life death the universe and the nature of reality itself The first step is acknowledging that our existing model of reality is looking increasingly creaky in the face of recent scientific discoveries Science tells us with some precision that the universe is 26.8 percent dark matter 68.3 percent dark energy and only 4.9 percent ordinary matter but must confess that it doesn't really know what dark matter is and knows even less about dark energy Science is increasingly pointing toward an infinite universe but has no ability to explain what that really means Concepts such as time space and even causality are increasingly being demonstrated as meaningless All of science is based on information passing through our consciousness but science hasn't the foggiest idea what consciousness is and it can't explain the linkage between subatomic states and observation by conscious observers Science describes life as a random occurrence in a dead universe but has no real understanding of how life began or why the universe appears to be exquisitely designed for the emergence of life The biocentrism theory isn't a rejection of science Quite the opposite Biocentrism challenges us to fully accept the implications of the latest scientific findings in fields ranging from plant biology and cosmology to quantum entanglement and consciousness By listening to what the science is telling us it becomes increasingly clear that life and consciousness are fundamental to any true understanding of the universe This forces a fundamental rethinking of everything we thought we knew about life death and our place in the universe [Más allá del biocentrismo](#) Dr. Robert Lanza, 2018-07-27

Sincronicità ed entanglement quantistico. Seconda edizione molto ampliata Bruno Del Medico, 2025-06-28 Hai mai vissuto un momento in cui una coincidenza apparentemente banale si rivela cos significativa da lasciarti senza parole Forse hai pensato a una persona che non sentivi da anni e pochi minuti dopo quella stessa persona ti ha chiamato al telefono O magari hai sognato un evento e il giorno dopo si avverato nei minimi dettagli Succede anche a te Queste esperienze che sfidano la logica e sembrano suggerire un ordine nascosto nell universo sono ci che Carl Jung ha chiamato sincronicit l apparente connessione tra eventi senza legame causale ma ricchi di un significato profondo Questo libro ti accompagner in un viaggio tra le tracce invisibili che sembrano collegare la mente umana con la realt e le leggi del cosmo Lungo il percorso esploreremo strane coincidenze presentimenti e telepatia Racconteremo di come Jung con il suo concetto di inconscio collettivo abbia dato un volto teorico a questi fenomeni Scopriremo parallelismi sorprendenti con una delle scoperte pi enigmatiche della fisica moderna l entanglement quantistico quel fenomeno per cui particelle separate nello spazio restano misteriosamente connesse La storia ricca di coincidenze sconcertanti che sembrano trascendere il caso Questi eventi ci rimandano a una questione cruciale siamo davvero noi a creare il nostro destino o esiste un progetto che si manifesta attraverso eventi sincronici suggerendo una rete di connessioni invisibili Carl Jung ha dedicato gran parte della sua vita a esplorare l inconscio umano scoprendo che non solamente individuale ma anche collettivo Dentro ognuno di noi vivono simboli immagini e idee universali che attraversano le epoche e le culture Li ha chiamati archetipi Immagina l archetipo del viandante o quello dell eroe Li trovi nella mitologia greca Ulisse nella narrativa moderna Harry Potter e persino nei sogni delle persone comuni Jung sosteneva che questi archetipi risiedono nel profondo del nostro inconscio e si manifestano spesso proprio attraverso sogni o coincidenze sincroniche In questo modo la sincronicit diventa un linguaggio universale un modo per connetterci a qualcosa di pi grande Un famoso esempio di sincronicit legato agli archetipi quello descritto dallo stesso Jung Racconta di una paziente che stava raccontando il suo sogno di un coleottero dorato Proprio mentre parlava un coleottero simile si pos sulla finestra dello studio Per Jung l evento non era casuale il coleottero era un simbolo archetipico di trasformazione che aveva un significato profondo per la paziente La fisica quantistica apparentemente distante dal mondo

della psicologia ha rivelato un interconnessione profonda e misteriosa tra le particelle Il fenomeno dell'entanglement quantistico mostra che due particelle separate da una distanza infinita possono influenzarsi reciprocamente istantaneamente Ma cosa accade se estendiamo questi principi alla mente umana Negli ultimi anni molte teorie hanno suggerito che la coscienza stessa potrebbe funzionare in modo simile agli campi quantistici Aneddoti di telepatia e presentimenti sembrano suggerire che le nostre menti siano collegate da connessioni invisibili proprio come le particelle nell'entanglement Come scriveva il filosofo Erwin Schrödinger uno dei padri della meccanica quantistica La coscienza una sola Non esiste un pluralismo della coscienza Jung con la sua visione psicologica e Schrödinger con il suo approccio scientifico sembrano suggerire che esiste una rete universale di connessioni che ci lega gli uni agli altri e all'universo Forse leggendo queste pagine scoprirai che le coincidenze che hai vissuto non sono eventi isolati ma frammenti di un grande disegno Sar un invito a vedere il mondo con occhi nuovi Perchè alla fine succede anche a te Il cosmo della mente Edoardo Boncinelli, Antonio Ereditato, 2018-08-30 Quanti anni ha la vita Qual il destino delle stelle Se l'atomo fatto di vuoto che cosa sostiene il mondo Perchè solo i nostri neuroni tra quelli di tutte le specie sono in grado di descrivere i neutrini Edoardo Boncinelli e Antonio Ereditato ci raccontano l'avventura dell'Universo dall'esplosione iniziale al costituirsi dell'architettura delle galassie dal principio dello spaziotempo all'evoluzione dei sapiens e al sorgere della coscienza umana Tornano a istanti che vanno da 10⁻³⁰ a 10⁻²⁰ secondi dopo il Big Bang durante i quali sono avvenuti cambiamenti più importanti che nell'ultimo miliardo di anni Ci spiegano la natura ambivalente delle particelle elementari corpuscolare e ondulatoria insieme grazie a cui possiamo far rivivere in laboratorio il cosmo ai suoi esordi clonando il dinosauro Universo appena nato Si spingono fino ai giganteschi filamenti delle galassie che formano la rete del cosmo e oltre agli insondabili buchi neri Penetrano il mistero di un cervello troppo grande e complesso per sostenere soltanto la sua sopravvivenza ed enunciano una grande verità fra tutto ciò che conosciamo solo la nostra mente indecifrabile congegno biologico con neuroni più numerosi delle stelle che popolano la Via Lattea ci consente di donare una storia all'Universo in cui pensiamo e agiamo da milioni di anni di donargli in fondo l'esistenza Il cosmo della mente spazia dalle distanze siderali all'infinitamente piccolo ascolta il moto di espansione dell'Universo il suo respiro osserva quelle grandezze di cui solo oggi grazie agli ultimi progressi tecnologici iniziamo davvero ad avere contezza un viaggio attraverso cui il lettore avrà modo di avvicinarsi alla radiazione cosmica di fondo al luogo in cui sul confine tra noto e ignoto svanisce ogni certezza e ci affacciamo alla vertigine dell'oscurità dove insieme alle stelle brillano il mistero e la bellezza del cosmo lasciandoci senza fiato
