Positive Free Speech Andrew T Kenyon, Andrew Scott, 2020-05-28 Freedom of expression is generally analysed as a bare liberty against restraint by state action Underpinning rationales for freedom of speech very often imply however that the concept also has important positive aspects and that to be truly democratic the modern polity requires more than negative freedom In contemporary conditions this understanding of free speech raises matters such as media diversity or pluralism the concept of voice and access to the public sphere access to information and the need to rethink the audience in relation to public speech Whether securing positive free speech is a matter of politics or of law a task for legislatures or for courts is an open question On one level any programme of inculcating positive dimensions of free speech might be understood as inherently polycentric and hence political in character Yet a number of jurisdictions evince enhanced legal recognition for the principle The aim of this collection of papers is to interrogate the rationales of positive free speech to consider the political and juridical methods by which it has or may be more fully reflected in the modern state and to consider the range of practical contexts in which its valorisation has or would have significant implications The contributors are drawn from an array of European and international jurisdictions They include academic lawyers and communications researchers

Hate Spin Cherian George, 2016-09-23 How right wing

political entrepreneurs around the world use religious offense both given and taken to mobilize supporters and marginalize opponents In the United States elements of the religious right fuel fears of an existential Islamic threat spreading anti Muslim rhetoric into mainstream politics In Indonesia Muslim absolutists urge suppression of churches and minority sects fostering a climate of rising intolerance In India Narendra Modi s radical supporters instigate communal riots and academic censorship in pursuit of their Hindu nationalist vision Outbreaks of religious intolerance are usually assumed to be visceral and spontaneous But in *Hate Spin* Cherian George shows that they often involve sophisticated campaigns manufactured by political opportunists to mobilize supporters and marginalize opponents Right wing networks orchestrate the giving of offense and the taking of offense as instruments of identity politics exploiting democratic space to promote agendas that undermine democratic values George calls this strategy hate spin a double sided technique that combines hate speech incitement through vilification with manufactured offense taking the performing of righteous indignation It is deployed in societies as diverse as Buddhist Myanmar and Orthodox Christian Russia George looks at the world s three largest democracies where intolerant groups within India s Hindu right America s Christian right and Indonesia s Muslim right are all accomplished users of hate spin He also shows how the Internet and Google have opened up new opportunities for cross border hate spin George argues that governments must protect vulnerable communities by prohibiting calls to action that lead directly to discrimination and violence But laws that try to protect believers feelings against all provocative expression invariably backfire They arm hate spin agents offense taking campaigns with legal ammunition Anti discrimination laws and a commitment to religious equality will protect communities more meaningfully than misguided attempts to insulate them from insult

Cultural Policy in the Polder Edwin Meerkerk, Quirijn Lennert Hoogen, 2025-10-01 At the

occasion of the 25 anniversary of the Dutch Cultural Policy Act Dutch academics in cultural policy research have compiled a volume to commemorate the quarter century in which Dutch cultural policy has developed and analyse the key debates in Dutch cultural policy for the coming years Historically central public authority in the Netherlands has been problematic The country's origin as a confederation of seven independent republics has had effect in the sense that government usually works bottom up As a result the Netherlands has relatively few national cultural institutions when compared to other countries Moreover the national media never have been linked to the nation state It is therefore surprising that the nation's cultural policy can be described as a national system in which the nation state sets the agenda rather than cities and regions
