Prehistoric and Early Wales I. Ll. Foster, Glyn Daniel, 2014-10-24 This volume is based on lectures given when the British Summer School of Archaeology was held at Bangor in August 1959 It is a summary account of current knowledge then about ancient Wales written for archaeologists historians and others covering the Old Stone Age Neolithic Wales the Bronze Age Early Iron Age Roman Wales and Wales in the fifth to seventh centuries A D From Coast to Fen: Archaeology in a Dynamic Landscape Claire Christie, Joshua T. Hogue, 2025-07-18 Excavations across East Lincolnshire reveal prehistoric Iron Age Roman and post medieval settlements saltmaking and industrial activity shaped by changing landscapes The area between Anderby Creek and Bicker Fen Lincolnshire to the west of the Lincolnshire Wolds represents a dynamic landscape both in terms of its natural and human aspects This volume presents the results of an extensive programme of archaeological excavation undertaken by Headland Archaeology UK Ltd and Allen Archaeology Ltd from 2018 to 2019 where a total of 15 sites were excavated The excavations uncovered a panoply of remains spanning the prehistoric through to modern periods providing important insights into changing patterns of occupation and the way this diverse landscape was utilised As evidenced through the archaeological works the area saw limited activity during the early prehistoric period in part reflecting the prevailing environmental conditions in which most of the area was inundated Among the earliest recorded finds was an enigmatic middle Bronze Age timber structure as well as a copper alloy axe During the Roman period there is evidence for an expansion in activity across the Scheme with formerly inundated areas becoming accessible Activity within the northern half of the Scheme was focused upon salt production Two of these sites were dated to the late Roman period contrary to the prevailing notion that the salt industry in this region had declined by the mid 2nd century AD Within the southern half of the Scheme were several Roman farmsteads some featuring timber buildings Notable among these was an unusual post built moated structure From these sites a range of artefactual and environmental data was collected providing important insights into the nature of agricultural regimes Evidence of medieval and post medieval activity was also uncovered providing important insights into the development of rural settlement against a backdrop of landscape and environmental changes Evidence of late to post medieval clay extraction and brick manufacture was also identified **The Archaeologists' Year Book**, 1973 **The Remains of the Past and the Invention of Archaeology in Roman Anatolia** Felipe Rojas, 2019-10-17 Examines how people in the Roman past thought about even earlier ruins and material remains it examines incidents that could be described as archaeology in antiquity *Dictionary Catalog of the Research Libraries of the New York Public Library, 1911-1971* New York Public Library.
