British Leyland James Taylor, 2018-03-26 In 1968 British Leyland brought together many of Britain's motor manufacturers with the intention of creating a robust unified group that could equal the strength of the big European conglomerates. But this was not to be. There have been many books about the politics and the business activities of British Leyland, but *British Leyland The Cars 1968-1986* looks exclusively at the cars that came from the company, both the models it inherited and those it created. The eighteen years of the corporation's existence saw a confusing multitude of different car types, but this book resolves these confusions, clarifying who built what and when. The book takes 1986 as its cut-off point because this was the year that the old British Leyland ceased to exist and what was left of the car and light commercial business was renamed the Rover Group. The book includes production histories and technical specifications of every major model. The special overseas models. Appendices on engines, code names and factories. Buying guidance on the models built in Britain. This is the most comprehensive book so far to focus on the cars from British Leyland between 1968-1986, and it provides an overview of each model's production history together with essential specification details. It is profusely illustrated with 178 colour and 63 b/w photographs. *Motor Cycling and Motoring*, 1987. **Rover Cars 1945 to 2005** James Taylor, This comprehensive pictorial overview of Rover cars covers 1945-2005 models. It describes and illustrates all the great classic Rovers up to and including the SD1. British Leyland models with Rover badges, the models designed in conjunction with Honda, the later British designed cars, and finally the little known City Rover. **Autocar**, 2004.
