Low Carbon Economy and Health in the Context of Carbon Neutrality

Yuanjun Zhao, Chunjia Han, Zheng Liu, 2023-12-08 Global warming has led to increasing climate risks and climate change is a global issue facing mankind. Therefore, most developed countries have set a clear goal of achieving carbon neutrality after reaching peak carbon emissions. In the context of global warming, a low carbon economy based on low energy consumption and low pollution has become a global popular research topic. At present, the international community has formed a consensus on green transformation and taken practical actions. At the same time, the achievement of the carbon neutrality goal has highlighted the importance of public health, and therefore a series of new research directions are emerging and how to develop a low carbon economy and protect public health while achieving the carbon neutrality goal has become an important issue. In the post epidemic era, economic recovery and public health issues need to be addressed, and a low carbon economy and public health will face even greater challenges with carbon neutrality goals placing this issue at the forefront. For this Research Topic, we would like submissions that provide research results on topics such as green development, green low carbon, resource conservation, low carbon economy, low carbon development, low carbon living, low carbon society, population health, health distribution, health awareness, health behavior, and public health. Quantitative, qualitative, and mixed methods approaches are welcome to explore the low carbon economy and public health from multiple perspectives. The developmental history of the low carbon economy, the level of development, and the evaluation of the level of development. The many challenges faced by the low carbon economy in the development process and how to deal with the challenges in the development process. The development of a low carbon economy is influenced by a variety of factors such as low carbon investment, policy, norms, technology, development, energy, development, and digitalization levels, etc. We would like research works which study the factors that influence the development of a low carbon economy. Analyze which industries will have an impact on the development of a low carbon economy, including but not limited to the energy industry, transportation industry, and construction industry. To study the factors that affect the development of public health and how to improve public health. To study the impact of residential environment, sports environment, community environment, etc. on public health. To study the methods used in studies related to the development of a low carbon economy and public health development. To analyze the impact of the development of a low carbon economy on other industries such as international trade, the real estate industry, and tourism.
