Fast Track Land Occupations in Zimbabwe Kirk Helliker, Sandra Bhatasara, Manase Kudzai Chiweshe, 2021-01-11 This book offers the first detailed scholarly examination of the nation-wide land occupations which spread across the Zimbabwean countryside from the year 2000 and led to the state's fast track land reform programme. In an innovative way, it highlights the decentralized character of the occupations by recognizing significant spatial variation around a number of key themes, including historical memory, modes of mobilization,

and gender A case study of the land occupations in Mashonaland Central Province based on original research adds empirical weight to the argument In further identifying and understanding the specificities and complexities of the land occupations the book also frames them by way of a nuanced comparative historical analysis of the three zimurenga It thus examines the land occupations referred to likely controversially as the third chimurenga with reference to the original anti colonial revolt from the 1890s the first chimurenga and the war of liberation in the 1970s the second chimurenga Further the book engages critically with the ruling party s chimurenga narrative and the hegemonic understanding of the land occupations within Zimbabwean studies This book is a crucial read for all scholars and students of post 2000 land and politics in Zimbabwe but also for those more broadly interested in historical comparative analyses of land struggles in Zimbabwe and beyond

Accountability in education: meeting our commitments UNESCO,2017-10-30 The second edition of the Global Education Monitoring Report GEM Report presents the latest evidence on global progress towards the education targets of the UN Sustainable Development Goals With hundreds of millions of people still not going to school and many not achieving minimum skills at school it is clear education systems are off track to achieve global goals The marginalized currently bear the most consequences but also stand to benefit the most if policy makers pay sufficient attention to their needs Faced with these challenges along with tight budgets and increased emphasis on results oriented value for money countries are searching for solutions Increased accountability often tops the list The 2017 8 GEM Report

shows the entire array of approaches to accountability in education. It ranges from countries unused to the concept where violations of the right to education go unchallenged to countries where accountability has become an end in itself instead of a means to inclusive equitable and high quality education and lifelong learning for all. The report emphasizes that education is a shared responsibility. While governments have primary responsibility, all actors—schools, teachers, parents, students, international organizations, private sector providers, civil society, and the media—have a role in improving education systems. The report emphasized the importance of transparency and availability of information but urges caution in how data are used. It makes the case for avoiding accountability systems with a disproportionate focus on narrowly defined results and punitive sanctions. In an era of multiple accountability tools, the report provides clear evidence on those that are working and those that are not. Back cover
