Prayers in the Precincts John C. Green, Mark J. Rozell, Clyde Wilcox, 2000-04-04 In the wake of the Clinton Lewinsky scandal the Christian Right expected major victories in the 1998 elections Instead many of its allies lost close contests and the movement was seen as a liability in some high profile campaigns In the only in depth study of the Christian Right's role in these races leading scholars analyze the role of the movement in fourteen key states from Maine to California and address speculations that the movement is fading from the American political scene The book focuses on elections on the state and local levels where the Christian Right is most influential and it describes the movement's niche in some detail Although each campaign described in the book had its unique characteristics the editors have drawn some broad conclusions about the 1998 elections While the movement was weak in the areas of candidate recruitment and fundraising they say the outcome may have also been related to external factors including a broader turnout of typically Democratic constituencies and the country's boredom with the scandal that conservatives had made the centerpiece of their campaign Despite the setbacks of 1998 the contributors argue the Christian Right continues to have an enormous influence on the political dialogue of the country Written from an unbiased nonpartisan

opinion surveys in the twentieth century we now have extensive data on how Americans have gauged legislative performance throughout the many years. That said, the responses to the questions pollsters typically pose reflect partisanship, policy, and personality. Generally, respondents respond favorably to legislatures controlled by their own political party and those in power during good economic times. Incumbent lawmakers get ratings boosts from having personalities, home styles, that mesh with those of their constituents. These relationships are important indicators of people's thoughts regarding the current performance of their legislatures and legislators, but they tell us nothing about attitudes toward the institution and its organizational characteristics. This study offers a unique perspective on what American voters have historically thought about legislatures as organizations and legislators as representatives. Rather than focusing on responses to surveys that ask respondents how they rate the current performance of lawmakers and legislatures, this study leverages the most significant difference between national and state politics: the existence of ballot propositions in the latter. At the national level, Americans have never had any say over Congress's structure, rules, or procedures. In contrast, at the state level, they have had ample opportunities over the course of more than two centuries to shape their state legislatures. The data examined here look at how people have voted on more than 1,500 state ballot propositions targeting a wide array of legislative, organizational, and parliamentary features. By linking the votes on these measures with the public debates preceding them, this study documents not only how Americans viewed various aspects of their legislatures but also whether their opinions held constant or shifted over time. The findings reported paint a more nuanced picture of Americans' attitudes toward legislatures than the prevailing one derived from survey research. When presented with legislative reform measures on which concrete choices were offered and decisions on them had to be made, the analyses presented here reveal that, counter to the conventional wisdom that people loved their representatives but hated the legislature, voters usually took charitable positions toward the institution while harboring skeptical attitudes about lawmakers' motives and behaviors. **Orange Coast Magazine**, 1982-08
