Ocimf Mooring Equipment Guidelines 4th Edition:

Mooring Equipment Guidelines OCIMF, 2018 *Mooring Equipment Guidelines*, 1997-01-01 Ports and Waterways
Mark van Koningsveld, Henk Verheij, Poonam Taneja, Huib de Vriend, 2023-02-09 Before you lies the book *Ports and Waterways Navigating the changing world* written by the Ports and Waterways team part of the Civil Engineering and Geosciences faculty at Delft University of Technology. It integrates the content of a number of separate lecture notes we used in our teaching activities and updates this information where relevant. The integration reflects our vision that ports and waterways should be viewed as parts of a coherent system that supports waterborne supply chains and that their integral design and operation is essential.

Dangerous Cargoes in Port Maritime Navigation Commission. Working Group No. 35, 2000 *Jetties and Wharfs* CROW, 2021-09-29 For centuries jetties and wharfs have been designed and built around the world and play an important role in contemporary ports. The difference in the use of jetties, piers and wharfs is that jetties are frequently used for the transshipment and storage of light materials and ro-ro traffic while piers are generally used for heavy loads like iron ore. That is why piers are mostly designed and constructed like quay walls which are beyond the scope of this handbook. The designs were originally based on trial and error and the insights of those who dared to conquer local conditions such as wind, waves, currents and soil composition. Design and construction techniques have since evolved into the designs we see on the coast or in river ports and seaports nowadays. The purpose of this handbook is to provide insight and guidelines regarding aspects that are important in the design of jetties and wharfs. Jetty specific issues such as loads, interfaces between materials, installations on jetties and wharfs as well as detailing aspects are also covered. This handbook is part of a series of Dutch port infrastructure design recommendations that include the Quay Walls handbook and Flexible Dolphins handbook.

Recommendations of the Committee for Waterfront Structures Harbours and Waterways HTG, Deutsche Gesellschaft für Geotechnik, 2024-02-12 The recommendations have been completely restructured in this 12th 2020 edition of the EAU 10th English edition, the aim being to provide readers with a better, clearer arrangement of the chapters. In addition, the information published in the annual technical reports of the Waterfront Structures Committee since the publication of the 11th German edition have been incorporated in this new edition. The recommendations also take into account the new generation of standards consisting of Eurocode 7, the associated National Application Documents and supplementary national publications DIN 1054:2010. In isolated instances, partial safety factors differing from those in the codes are specified on the basis of practical experience. Safety standards for ports, harbours and marine structures are therefore upheld. The recommendations satisfy the need for international acceptance in the planning, design, tendering, award of contract, construction, site supervision, acceptance and settlement of accounts for port, harbour and waterway facilities based on uniform approaches.
