 Hitchins,2016-03-03 Vibe Merchants offers an insider s perspective on the development of Jamaican Popular Music
 researched and analysed by a thirty year veteran with a wide range of experience in performance production and academic
 study This rare perspective derived from interviews and ethnographic methodologies focuses on the actual details of music
 making practice rationalized in the context of the economic and creative forces that locally drive music production By
 focusing on the work of audio engineers and musicians recording studios and recording models Ray Hitchins highlights a
 music creation methodology that has been acknowledged as being different to that of Europe and North America The book
 leads to a broadening of our understanding of how Jamaican Popular Music emerged developed and functions thus providing
 an engaging example of the important relationship between music technology and culture that will appeal to a wide range of

 Hinchey,Anastasia Pagnoni,Franz J. Rammig,Hartmut Schmeck,2008-07-09 Look deep into nature and you will understand
 everything better advised Albert Einstein In recent years the research communities in Computer Science Engineering and
 other disciplines have taken this message to heart and a relatively new field of biologically inspired computing has been born
 Inspiration is being drawn from nature from the behaviors of colonies of ants of swarms of bees and even the human body
 This new paradigm in computing takes many simple autonomous objects or agents and lets them jointly perform a complex
 task without having the need for centralized control In this paradigm these simple objects interact locally with their
 environment using simple rules Applications include optimization algorithms communications networks scheduling and
 decision making supply chain management and robotics to name just a few There are many disciplines involved in making
 such systems work from artificial intelligence to energy aware systems Often these disciplines have their own field of focus
 have their own conferences or only deal with specialized s problems e g swarm intelligence biologically inspired computation
 sensor networks The Second IFIP Conference on Biologically Inspired Collaborative Computing aims to bridge this separation
 of the scientific community and bring together researchers in the fields of Organic Computing Autonomic Computing Self
