Roulette Cracker John Hare, Roulette is a fixed odds game Unlike card games bingo and some other casino games where there are so many variables the odds the probability of winning on a roulette table are fixed for every bet If you know how the game works and understand something about the statistical probabilities of the bets you can reduce the risk of losing and play with the odds in your favour Surprisingly even though you may win more often you will almost certainly put your winnings back and lose in the long run if you just continue what you are doing This is a statistical fact and is because the European table has an advantage of 2.7% Despite this however there are still ways to help counteract the problem particularly if you change the way you bet and introduce a betting ratio into your play If you get it right you could at least extend your time on the table reduce your losses or maybe even return to profit This book started out as the instruction

manual for the Roulette Cracker software a sophisticated algorithm It still is the instruction manual but sections have been re written and now contain information which can be very useful to a roulette player with or even without the software whether they are playing for fun or for real in a casino or on line The software is accessed by logging onto our web site and enrolling for one of the 3 6 or 12 month membership options but the book can be purchased separately In addition to gaining some useful information about roulette without membership buying the book allows you to learn exactly how the software works and what additional benefits you might get this will help you make the most of your membership of Roulette Cracker [www Roulette Cracker co uk](http://www.RouletteCracker.co.uk)
