Trust Building and Boundary Spanning in Cross-Border Management Michael Zhang, 2018-03-09 This edited book addresses two critical issues in international management building trust and managing boundary spanning activities between international business partners The dual process of internationalization of multinational corporations MNCs through globalisation and regionalisation has helped MNCs to increase their market expansion and improve the capabilities of innovation and learning By creating various forms of international strategic alliances ISAs MNCs have become structurally more complex and geographically more dispersed As a result MNCs in general and ISAs in particular face the challenges of discerning blurred organisational boundaries reconfiguring the control mechanisms integrating diversified resources and coordinating distributed activities in time and space Research in organisation behaviour indicates that boundary spanners play critical yet unspecified roles and functions in managing cross boundary relationships A core boundary spanning function is to build trust

relationships When organisations engage in business transactions members of the organisations are concerned with not only the outcomes of economic transactions but also the processes of social exchanges Boundary spanners may succeed in building interpersonal trust in a partnership nonetheless their effort may not lead to inter partner trust without an effective implementation of the institutionalisation process Whereas trustworthiness is the antecedent to trust providing the basis for trust to develop distrust manifests itself as a separate and linked concept to trust These dynamic features of trust trustworthiness and distrust are critically elaborated Trust Building and Boundary Spanning in Cross Border Management is dedicated to explicating these under researched themes and contributing to the emerging streams of research in micro foundations and micro structural approaches It illustrates the latest research on the topic and will be of interest to both students at an advanced level academics and reflective practitioners in the fields of organisational behaviour and theory strategic management international strategy and strategic alliances

Re-thinking Diversity Cordula

Braedel-Kühner, Andreas Müller, 2015-12-01 This volume entails a collection of new ideas themes and questions towards a phenomenon which we are used to refer to with the key term diversity The aim of the book is to offer a cultural sciences perspective on diversity to advance knowledge about it and enrich the dialogue between academics and practitioners in related domains of action Today changes in the demographic structures of the population the migration flux multiculturalism the rising awareness concerning minorities rights gender studies and so on lead to a complex picture of what diversity means The narrative of a society and of most organizations is constituted by multiple layers of social categorization segregation and identity Therefore diversity defies simple definition The contributions in this volume approach the phenomenon from different angles and reveal new theoretical methodological and practical perspectives on it
