Subluxations:

are areas of tension, altered motion, or spinal misalignment that can interfere with nervous system function

they can affect the functions of your body well before spinal pain or discomfort is noticed

research indicates that pressure equal to the weight of a 10c piece can alter the information flow along a nerve by up to 50%

Your spine, when moving well, free from subluxations, is central to the optimum health and wellbeing of your body and mind
