PERIODIC TABLE ORGANIZATION

Get lost in the periodic table! Represents a specific element's location on the PT way carefully assigned based on each element's properties.

DIATOMIC MOLECULES

Many 2 or more atoms of the same element chemically combine. They are most prevalent as an element because they are the most stable of the same type of atom. They are just molecules. These types of molecules are called diatomic molecules. They are usually represented in 2 ways.

Understanding the structure of atoms helps explain how atoms combine and form the molecules they are able to react with other elements.
