The Private-Public Law Divide in International Dispute Resolution Burkhard Hess, 2019-03-25 This course addresses dispute resolution in international cases from the classical perspective of the private public divide The main focus relates to overlapping remedies available under private international and public international law Nowadays a multitude of courts and arbitral tribunals at different levels domestic international and transnational is accessible to litigants in cross border settings There are three different areas where the private public divide is applicable The first pertains to lawsuits in

civil courts involving foreign states state enterprises and international organizations The second area relates to the delineation between domestic and international remedies The third area concerns the privatization of dispute settlement especially in the context of private ordering This study argues that the private public divide still exists and cannot be given up However one must be aware that private and public international law have complementary functions in order to address adequately the multitude of disputes at both the cross border and the international level In this context this divide can be used as an appropriate tool to explain the complementarity of private and public international law in the multilevel legal structure of a globalized world

Discrimination and Delegation Lamis Elmy Abdelaaty, 2021-01-22 What explains the variety of responses that states adopt toward different refugee groups Refugees might be granted protection or turned away they might be permitted to live where they wish and earn an income pursue education and access medical treatment or they might be confined to a camp and forced to rely on aid while being denied basic services However states do not consistently wield their capacity for control nor do they jealously guard their authority to regulate In this book Lamis Elmy Abdelaaty asks why states sometimes assert their sovereignty vis vis refugee rights and at other times seemingly cede it by delegating refugee oversight to the United Nations To explain this selective exercise of sovereignty Abdelaaty develops a two part theoretical framework in which policymakers in refugee receiving countries weigh international and domestic concerns Policymakers in a receiving country might decide to offer protection to refugees from a rival country in order to undermine the sending country's stability saddle it with reputation costs and even engage in guerilla style cross border attacks At the domestic level policymakers consider political competition among ethnic groups welcoming refugees who are ethnic kin of citizens can satisfy domestic constituencies expand the base of support for the government and encourage mobilization along ethnic lines When these international and domestic incentives conflict the state shifts responsibility for refugees to the UN which allows

policymakers to placate both refugee sending countries and domestic constituencies Abdelaaty analyzes asylum admissions worldwide and then examines three case studies in depth Egypt a country that is broadly representative of most refugee recipients Turkey an outlier that has limited the geographic application of the Refugee Convention and Kenya home to one of the largest refugee populations in the world Discrimination and Delegation argues that foreign policy and ethnic identity more so than resources humanitarianism or labor skills shape reactions to refugees

Essays on Strategy Analysis for Seaports Elvira Haezendonck, 2001 The increasingly competitive market environment in which port clusters operate today imposes new requirements on port strategy analysis Many port authorities and port operators now realize that a static approach to cost leadership a sole focus on inherited factor advantages and a simplistic reliance on new infrastructure to attract or retain clients are no longer sufficient to guarantee a port's competitive success They need to offer greater value added to port users as well as to society Hence this new market environment forces ports to reconsider their present strategic position and to reflect on the strategic options for the future The book builds upon an in depth survey of economic actors in the Antwerp seaport cluster with a specific focus on the container and conventional cargo clusters It attempts to answer the question why these particular port clusters are more competitive than similar clusters in other ports In order to answer this question the study develops and extends a number of formal tools of strategy analysis that should be useful to both port authorities and port operators

Advances in Shipping Data Analysis and Modeling César Ducruet, 2017-11-06 Shipping flows maritime footprints remain underexplored in the existing literature despite the crucial importance of freight transport for global trade and economic development Additionally decision makers lack a comprehensive view on how shipping flows can be measured analyzed and mapped in order to support their policies and strategies This interdisciplinary volume drawing on an international cast list of experts explores a number of crucial issues in shipping data estimation construction collection mining analysis visualization and mapping Advances in Shipping Data Analysis and Modeling delivers several key messages First that in a world of just in time delivery and rapid freight transit it is important to bear in mind the long term roots of current trends as well as foreseeable future developments because shipping patterns exhibit recurrent if not cyclical and path dependent dynamics Second shipping flows are currently often understood at the micro level of intra urban logistics delivery and at the national level using commodity flow analyses but this volume emphasizes the need to expand the scale of analysis by offering new evidence on the changing distribution of global and international shipping flows based on actual data Third that this multidisciplinary approach to shipping flows can shed important light on crucial issues that go beyond shipping itself including climate change urban development technological change commodity specialization digital humanities navigation patterns international trade and regional growth Edited by experts in their field this volume is of utmost importance to those who study industrial economics shipping industries and economic and transport geography
