Undergraduate Research Experiences for STEM Students National Academies of Sciences, Engineering, and Medicine, Division on Earth and Life Studies, Board on Life Sciences, Division of Behavioral and Social Sciences and Education, Board on Science Education, Committee on Strengthening Research Experiences for Undergraduate STEM Students, 2017-06-19 Undergraduate research has a rich history and many practicing researchers point to undergraduate research experiences UREs as crucial to their own career success There are many ongoing efforts to improve undergraduate science technology engineering and mathematics STEM education that focus on increasing the active engagement of students and decreasing traditional lecture based teaching and UREs have been proposed as a solution to these efforts and may be a key strategy for broadening participation in STEM In light of the proposals questions have been asked about what is known about student participation in UREs best practices in UREs design and evidence of beneficial outcomes from UREs Undergraduate Research Experiences for STEM Students provides a comprehensive overview of and insights about the current and rapidly evolving types of UREs in an effort to improve understanding of the complexity of UREs in terms of their content their surrounding context the diversity of the student participants and the opportunities for learning provided by a research experience This study analyzes UREs by considering them as part of a learning system that is shaped by forces related to national policy institutional leadership and departmental culture as well as by the interactions among faculty other mentors and students The report provides a set of questions to be considered by those implementing UREs as well as an agenda for future research that can help answer questions about how

UREs work and which aspects of the experiences are most powerful **Standing between Life and Extinction** David L. Propst, Jack E. Williams, Kevin R. Bestgen, Christopher W. Hoagstrom, 2021-02-15 North American deserts lands of little water have long been home to a surprising diversity of aquatic life from fish to insects and mollusks With European settlement however water extraction resource exploitation and invasive species set many of these native aquatic species on downward spirals In this book conservationists dedicated to these creatures document the history of their work the techniques and philosophies that inform it and the challenges and opportunities of the future A precursor to this book *Battle Against Extinction* laid out the scope of the problem and related conservation activities through the late 1980s Since then many nascent conservation programs have matured and researchers have developed new technologies improved and refined methods and greatly expanded our knowledge of the myriad influences on the ecology and dynamics of these species *Standing between Life and Extinction* brings the story up to date While the future for some species is more secure than thirty years ago others are less fortunate Calling attention not only to iconic species like the razorback sucker Gila trout and Devils Hole pupfish but also to other fishes and obscure and fascinating invertebrates inhabiting intermittent aquatic habitats this book explores the scientific social and political challenges of preserving these aquatic species and their habitats amid an increasingly charged political discourse and in desert regions characterized by a growing human population and rapidly changing climate *Aquatic Monocotyledons of North America* Donald H. Les, 2020-05-10 *Aquatic Monocotyledons of North America* brings together information on the natural history ecology and systematics of North American aquatic monocotyledons The book is an overview of the biology of major aquatic species by compiling information from numerous sources that lie scattered among the primary literature herbarium databases and other reference sources Information on more than 300 species in 87 genera of monocotyledons will be included Recent phylogenetic analyses will be incorporated Although focusing specifically on North America the cosmopolitan distribution of many aquatic plants should make this an attractive text to people working virtually anywhere outside of the region as well *Encyclopedia of Biomedical Engineering*, 2018-09-01 *Encyclopedia of Biomedical Engineering Three Volume Set* is a unique source for rapidly evolving updates on topics that are at the interface of the biological sciences and engineering Biomaterials biomedical devices and techniques play a significant role in improving the quality of health care in the developed world The book covers an extensive range of topics related to biomedical engineering including biomaterials sensors medical devices imaging modalities and imaging processing In addition applications of biomedical engineering advances in cardiology drug delivery gene therapy orthopedics ophthalmology sensing and tissue engineering are explored This important reference work serves many groups working at the interface of the biological sciences and engineering including engineering students biological science students clinicians and industrial researchers Provides students with a concise description of the technologies at the interface of the biological sciences and engineering Covers all aspects of biomedical engineering also incorporating perspectives from experts working

within the domains of biomedicine medical engineering biology chemistry physics electrical engineering and more Contains reputable multidisciplinary content from domain experts Presents a one stop resource for access to information written by world leading scholars in the field *Sustainable use and conservation of microbial and invertebrate biological control agents and microbial biostimulants* Food and Agriculture Organization of the United Nations,2023-01-27 Increasing concerns about the impact of pesticide use on biodiversity and human health and increasing demand for products from biodiversity friendly production systems including organic systems have led to increasing interest in alternative methods of pest control including the use of biological control agents This paper presents an overview of the current status of BCAs and biostimulants focusing only on micro organisms and invertebrates and their management needs and challenge in terms of improving their management and potential opportunities for the Commission and its Members to contribute to efforts to address these needs and challenges The scope covers all the sectors of agriculture as defined by FAO i e crop and livestock production forestry fisheries and aquaculture **Movement and Connectivity of Large Pelagic Sharks** Mark Meekan,J.
