Entry Costs and the Macroeconomy Germán Gutiérrez,Callum Jones,Mr.Thomas Philippon,2019-11-01 We combine a structural model with cross sectional micro data to identify the causes and consequences of rising concentration in the US economy Using asset prices and industry data we estimate realized and anticipated shocks that drive entry and concentration We validate our approach by showing that the model implied entry shocks correlate with independently constructed measures of entry regulations and M As We conclude that entry costs have risen in the U S over the past 20 years and have depressed capital and consumption by about seven percent

Adapt and Be Adept Terry L. Anderson,2021-04-01 How can markets help us adapt to the challenges of climate change Editor Terry L Anderson brings together this collection of essays featuring the work of nine leading policy analysts who argue that market forces are just as important as government regulation in shaping climate policy and should be at the heart of our response to helping societies adapt to climate change Anderson notes in his introduction that most current climate policies such as the Paris Agreement require hard to enforce collective action and focus on reducing or mitigating greenhouse gases rather than adapting to their negative effects Adaptive actions can typically deliver much more faster and more cheaply than any realistic climate policy The authors tackle a range of issues the hidden costs of renewable energy sources the political obstacles surrounding climate change policy insurance and financial instruments for pricing risk of exposure to the effects of climate change and more Reliance on emerging renewable energies and a carbon tax are not enough to prevent the effects of global warming they argue We must encourage more private action

The Role of the Indian Ocean for Global Peace - Interdisciplinary Issues Dr. (Capt.) Vivek Jain, 2023-11-02 This book deals with the various interdisciplinary issues of the Indian Ocean individually and collectively such as its history geography nautical elements economics trade routes old and new blue economy deep sea mining fisheries management tourism scourge of piracy pollution Law of the Sea UNCLOS 1982 and the different perspectives of its littoral countries on geopolitics international law international relations and maritime partnerships It is the most important ocean in the world 33% of the global population lives in the area and 50 60% of the world's maritime trade transits through it In addition around 60% of global oil and 26% of global gas reserves along with pristine beaches are located here To comprehend the interdisciplinary issues the editor embarked on a voyage to discover persuade and collaborate with exceptionally brilliant influential experts from prominent littoral countries India Indonesia Iran South Africa Malaysia and Singapore with relevant experience to expound the above subject areas In addition geopolitical conflicts hostilities and trade wars are on the rise war seems inevitable but not imminent Any conflict is likely to originate in other oceans and seas but will end up impacting the Indian Ocean's littoral countries Accordingly these countries must comprehend the interdisciplinary issues and the special role of the Indian Ocean to prevent all encompassing wars hostilities from widening at a global level and thereafter must flesh out plans to shield themselves They must also understand the area's role in working towards global peace by comprehending the above interdisciplinary issues The role of the Indian Ocean in global peace can only be achieved through maritime partnerships between its littoral countries and their avoidance of impulses to invite outside powers to balance each other's power However maritime partnerships are easier said than done At the very least the maritime partnership between two major Indian Ocean littoral powers India and Indonesia is critical to shield the region from geopolitical firestorms Hopefully this maritime partnership's tactic of embracing a carrot and stick approach will eventually persuade global powers from outside the Indian Ocean region to improve their conduct to achieve

global peace OECD Food and Agricultural Reviews Innovation, Agricultural Productivity and Sustainability in Turkey
OECD,2016-09-26 Productivity growth in the Turkish agricultural sector is supported today by better technologies crop varieties and animal breeds Yet improvements have slowed since the late 2000s and the productivity gap between agriculture and the rest of the economy remains large The Third Pillar Raghuram Rajan,2020-02-25 Revised and updated Shortlisted for the Financial Times McKinsey Business Book of the Year Award From one of the most important economic thinkers of our time a brilliant and far seeing analysis of the current populist backlash against globalization Raghuram Rajan distinguished University of Chicago professor former IMF chief economist head of India s central bank and author of the 2010 FT Goldman Sachs Book of the Year Fault Lines has an unparalleled vantage point onto the social and economic consequences of globalization and their ultimate effect on our politics In The Third Pillar he offers up a magnificent big picture framework for understanding how these three forces the state markets and our communities interact why things begin to break down and how we can find our way back to a more secure and stable plane The third pillar of the title is the community we live in Economists all too often understand their field as the relationship between markets and the state and they leave squishy social issues for other people That s not just myopic Rajan argues it s dangerous All economics is actually socioeconomics all markets are embedded in a web of human relations values and norms As he shows throughout history technological phase shifts have ripped the market out of those old webs and led to violent backlashes and to what we now call populism Eventually a new equilibrium is reached but it can be ugly and messy especially if done wrong Right now we re doing it wrong As markets scale up the state scales up with it concentrating economic and political power in flourishing central hubs and leaving the periphery to decompose figuratively and even literally Instead Rajan offers a way to rethink the relationship between the market and civil society and argues for a return to strengthening and empowering local communities as an antidote to growing despair and unrest Rajan is not a doctrinaire conservative so his ultimate argument that decision making has to be devolved to the grass roots or our democracy will continue to wither is sure to be provocative But even setting aside its solutions The Third Pillar is a masterpiece of explication a book that will be a classic of its kind for its offering of a wise authoritative and humane explanation of the forces that have wrought such a sea change in our lives **Controlling Capital** Nicholas Dorn,2016-02-12 Controlling Capital examines three pressing issues in financial market regulation the contested status of public regulation the emergence of culture as a proposed modality of market governance and the renewed ascendancy of private regulation In the years immediately following the outbreak of crisis in financial markets public regulation seemed almost to be attaining a position of command the robustness and durability of which is explored here in respect of market conduct European Union capital markets union and US and EU competition policies Subsequently there has been a softening of command and a return to public private co regulation positioned within a narrative on culture The potential and limits of culture as a regulatory resource are unpacked here in respect of occupational and organisational

aspects stakeholder connivance and wider political embeddedness Lastly the book looks from both appreciative and critical perspectives at private regulation through financial market associations arbitration of disputes and most controversially market policing by hedge funds Bringing together a distinguished group of international experts this book will be a key text for all those concerned with issues arising at the intersection of financial markets law culture and governance *Regional Research Frontiers - Vol. 2* Randall Jackson, Peter Schaeffer, 2017-04-17 This is the second volume in a two part series on frontiers in regional research It identifies methodological advances as well as trends and future developments in regional systems modelling and open science Building on recent methodological and modelling advances as well as on extensive policy analysis experience top international regional scientists identify and evaluate emerging new conceptual and methodological trends and directions in regional research Topics such as dynamic interindustry modelling computable general equilibrium models exploratory spatial data analysis geographic information science spatial econometrics and other advanced methods are the central focus of this book The volume provides insights into the latest developments in object orientation open source and workflow systems all in support of open science It will appeal to a wide readership from regional scientists and economists to geographers quantitatively oriented regional planners and other related disciplines It offers a source of relevant information for academic researchers and policy analysts in government and is also suitable for advanced teaching courses on regional and spatial science economics and political science The India-US Partnership Nish

Acharya, 2016-05-12 The story of US India relations is one of unfulfilled potential Despite their common commitment to democracy diversity and free markets their short and long term objectives have not aligned in a way to create a robust economic and political partnership These two nations which will soon be the second and the third largest economies in the world must find ways to increase their economic integration over the next 15 years through institutional capacity building creating a startup culture and using India's talent pool to resolve complex global problems Engaging the question of bilateral partnership from the perspectives of investment public policy and philanthropy Acharya delves into ways in which India can approach the goal of 1 trillion worth of economic ties with the US by 2030 Backed by 62 interviews of leaders from business government civil society and the academia and 30 case studies on the growing impact of American organizations on the Indian economy and of Indians on the American economy this study highlights organizations that are inspirational models for their sectors and are aiming at realizing a trillion dollar long term economic partnership between India and America
