

JANUARY ... DOES IT BRING YOU JOY?

- 1 January is the time for renewal on many fronts. It's the time of the year to re-evaluate everything. If something or someone doesn't bring you joy, it's pretty pointless carrying on with it. If we want the best, we must do our best. We must keep our family space safe and secure so that we are thriving as a people and as a nation. 5
- 2 In order to live their best lives, people are spreading themselves thinner and thinner with multiple streams of income. In the process we earn more but live less, we lose our focus of what is important.
- 3 With social media, keeping up with other Instagrammers are having a devastating effect on self-perception. Everything appears to be real perfect, but the fabric of our society is frazzled. Use January to take stock and start navigating new ways of doing things. Instead of multiple streams of sole sessions, travel more, and connect with people and places that bring you joy. 10

Masters Sculling Nancy Churchill, 2020-09-01 Masters scullers range in age from Grade AA 21 in the US or Grade A 27 in the UK to Grade M 89 plus. Although diverse in age, these athletes all have one thing in common: they are each unique. This book partners with each individual athlete to achieve performance improvements based on their own aspirations, technical skill, and fitness level. The focus is on understanding and efficiency both in the acquisition of skills and training. The dynamic technique described offers scullers a high performance sculling approach carefully tailored to support a Masters sculler's long term career. Illustrated with superb colour photographs, diagrams, and a wealth of examples, coverage includes individual assessment of an athlete's sculling skills, flexibility, and aerobic fitness; compilation and application of evidence-based data; formation of highly individual training programmes; experiments for athletes to explore their connectedness, versatility, and speed; and finally, race strategies and plans for competitive athletes. Based on the athlete's needs and aspirations, Masters Sculling provides you with the knowledge and skills to build an individual training plan that minimizes injury risk, achieves continuous improvement, and fosters a lifelong enjoyment of the sport. Application of Visual Data in K-16 Science

Classrooms Kevin D. Finson, Jon Pedersen, 2015-03-01 This book examines visual data use with students PK-16 as well as in pre-service and in-service science teacher preparation. Each chapter includes discussion about the current state of the art with respect to science classroom application and utilization of the particular visual data targeted by the author's discussion and explanation about the targeted visual data as applied by the author in his/her classroom; use of visual data as a diagnostic tool; its use as an assessment tool; and discussion of implications for science teaching and/or science teacher preparation. Although the body of research and practice in this field is growing, there remains a gap in the literature about clearly explicating the use of visual data in the science classroom. A growing body of literature discusses what visual data are, although this topic is still viewed as being at the beginning of its development in educators' thinking, and there are some scattered examples of studies exploring the use of visual data in science classrooms, although those studies have not necessarily clearly identified their foci as visual data per se. As interest and attention has become more focused on visual data, a logical progression of questioning has been how visual data are actually applied in the science classroom, whether it be early elementary, college, or somewhere in between. Visual data applications of interest to the science education community include how it is identified, how it can be used with students, and how students can generate it themselves; how it can be employed as a diagnostic tool in concept development; and how it can be utilized as an assessment tool. This book explores that as well as a variety of pragmatic ways to help science educators more effectively utilize visual data and representations in their instruction.

Leveled Reading, Leveled Lives Timothy Shanahan, 2025-07-28 An engaging and evidence based examination of how reading instruction has been misinterpreted and misapplied for decades and how to right the course to improve reading skills for all students In *Leveled Reading, Leveled Lives* leading literacy expert Timothy Shanahan curates a lively tour of the history of reading instruction in the United States arguing that the most popular reading instruction method is failing students and suppressing their literacy achievement He breaks down the reasons why teachers and researchers alike have favored this accepted wisdom known as instructional level theory in US schools over the past five decades and presents a compelling case for a new way forward that will bolster students reading skills Today it s not uncommon to find students in a fourth grade classroom reading books suitable for third second or even first graders Teachers suggest books to students at their deemed instructional levels but how these instructional levels are determined is suspect With a comprehensive critical analysis of instructional level pedagogy Shanahan exposes its shaky foundations and shows how faulty research findings have become so entrenched He gathers an extensive body of research studies that overwhelmingly contradict the instructional level theory and offers an evidence based consideration of how educators must instead use grade level reading to bring about maximum learning gains This seminal book concludes with practical advice for implementing grade level reading instruction including detailed descriptions of the types of instruction and scaffolding needed to increase students reading achievement from teaching decoding and challenging texts to scaffolding reading to maintaining motivation Shanahan asserts that a better approach can ensure that all students have an opportunity to leave high school with reading abilities commensurate with their personal social civic and economic goals
