Directions: There is an element on the periodic table that does not want to be located. Actually, this element is "hiding out." In an effort to elude you, the element has provided many false identities and it is your job to follow-up on all of these to locate it. However, the element is not as smart as it thinks; we know that all of these false identities are connected to each other. Therefore, providing the correct identity for each clue below will ultimately help you find the element (this means you should use each answer as a reference to get the next one). So, if you make just one mistake it will affect all clues and identities that follow; thus allowing this perpetrator to get away.
