Plant Life Cycles

FROM SEED TO TREE

Every plant begins its life as a tiny seed. The seed contains all the information it needs to grow into a mature plant. When the seed is planted in the soil, it begins to grow. The first stage is called germination. The seed absorbs water from the soil and starts to grow. The next stage is called the seedling stage. The seedling grows and develops into a young plant. The young plant grows and develops into a mature plant. The mature plant produces seeds, which can grow into new plants. This is the life cycle of a plant.
