Phytoremediation Potential of Medicinal and Aromatic Plants

Amit Kumar, Kuldeep Baudh, Sudhakar Srivastava, 2023-10-31 Environmental contamination of heavy metals is a major problem threatening sustainable agricultural production and health of millions of people. The extensive distribution of heavy metals in soil and water makes it necessary to employ environment friendly low cost and sustainable approaches for the remediation of contaminated sites. Phytoremediation has been considered a viable approach to meet these demands however it must provide some economic gains too. The use of economically important medicinal and aromatic plants is helpful in restoration of metal contaminated sites and also may provide economic gains to the farmers. The book brings about a critical overview of the prospects of utilizing medicinal and aromatic plants in phytoremediation including their utility economic benefits and human safety issues. The book will be a timely addition to the field and would act as landmark. This book is of interest to teachers researchers doctoral and graduate students working in the area of environmental pollution and cleanup technologies. The students working in the field of metal loid stress and crop biofortification will also find this to be a useful read. The content of the book is presented in simple language and represented through beautiful and scientifically informative figures and tables
