- **Price sensitivity to the price:** how much will an individual spend on a particular good if the price changes?
 - If the individual is **price sensitive**, then a small change in the price will lead to a large change in quantity demanded.
 - If the individual is **price insensitive**, then a large change in the price will lead to a small change in quantity demanded.
- **Income sensitivity:** how much will an individual spend on a particular good if their income changes?
 - If the individual is **income sensitive**, then a small change in income will lead to a large change in quantity demanded.
 - If the individual is **income insensitive**, then a large change in income will lead to a small change in quantity demanded.
- **Substitution effect:** the effect of a change in the price of a good on the quantity demanded, holding all other factors constant.
 - If the price of a good falls, the substitution effect will lead to an increase in the quantity demanded.
 - If the price of a good rises, the substitution effect will lead to a decrease in the quantity demanded.
- **Income effect:** the effect of a change in the price of a good on the quantity demanded, holding the substitution effect constant.
 - If the price of a good falls, the income effect will lead to an increase in the quantity demanded.
 - If the price of a good rises, the income effect will lead to a decrease in the quantity demanded.
- **Total effect:** the effect of a change in the price of a good on the quantity demanded, holding all other factors constant.
 - If the price of a good falls, the total effect will lead to an increase in the quantity demanded.
 - If the price of a good rises, the total effect will lead to a decrease in the quantity demanded.
