Scope Of Economic Paper for 2014:

Central Banks at a Crossroads Michael D. Bordo, Øyvind Eitrheim, Marc Flandreau, Jan F. Qvigstad, 2016-06-09

Throughout their long history the primary concern of central banks has oscillated between price stability in normal times and financial stability in extraordinary times. In the wake of the recent global financial crisis, central banks have been given additional responsibilities to ensure financial stability, which has sparked intense debate over the nature of their role. Bankers and policy makers face an enormous challenge finding the right balance of power between the central bank and the state. This volume is the result of an international conference held at Norges Bank, the central bank of Norway. International experts and policy makers present research and historical analysis on the evolution of the central bank. They specifically focus on four key aspects: its role as an institution, the part it plays within the international monetary system, how to delineate and limit its functions, and how to apply the lessons of the past two centuries. *The Age of Sustainable Development* Jeffrey D. Sachs, 2015-03-03

Jeffrey D. Sachs is one of the world's most perceptive and original analysts of global development. In this major new work, he presents a compelling and practical framework for how global citizens can use a holistic way forward to address the seemingly intractable worldwide problems of persistent extreme poverty, environmental degradation, and political economic injustice. Sustainable Development. Sachs offers readers, students, activists, environmentalists, and policy makers the tools, metrics, and practical pathways they need to achieve Sustainable Development Goals. Far more than a rhetorical exercise, this book is designed to inform, inspire, and spur action. Based on Sachs's twelve years as director of the Earth Institute at Columbia University, his thirteen years advising the United Nations secretary general on the Millennium Development Goals, and his recent presentation of these ideas in a popular online course, *The Age of Sustainable Development* is a landmark publication and clarion call for all who care about our planet and global justice. **Green Finance and**

Post-Trial Access to Drugs in Developing Nations Evaristus Chiedu

Obi, 2017-07-26. This book begins the discourse on post-trial access to drugs in developing countries. Underlying ethical issues in global health inequalities and global health research serve as the context of the debate. Due to rampant allegations of violations of rights of research participants, especially in developing countries, it discusses the regulatory infrastructure and ethical oversight of international clinical research, thus emphasizing the priority of safeguarding the rights of research

participants and host populations as desiderata in conducting clinical trials in developing countries This is the first book that analyzes the major obstacles of affordable access to drugs in developing countries patent and non patent factors and how they can be overcome through a middle ground approach and a new paradigm to establish global health justice which includes national and global health responsibilities The book also deals extensively with all complex aspects of the discourse on affordable access to drugs in developing countries including intellectual property law international regulations political and cultural systems international trade agreements Furthermore it contains a robust ethical debate and in depth analysis The book crafts a paradigm of global health justice involving a sliding scale of national and global responsibilities for the realization of the right to health in general and access to drugs in particular **World Economic Outlook, April 2018**

Postiglione,Jisun

Jung,2017-05-05 Hong Kong s universities have been transformed by the move from elite to mass higher education from government support to market driven finance from academic management to professional management from local to cross border and international outreach from China s education bridge to China s education window and from a colonial model of curricular specialization to a postcolonial model emphasizing broader intellectual development and service As the landscape of Hong Kong higher education has undergone change so have the backgrounds specializations expectations and work roles of academic staff The academic profession is ageing increasingly insecure more accountable more international at the same time more Mainland focused and less likely to be organized only along disciplinary lines The academic profession today is expected to be more innovative in teaching more productive in research and more entrepreneurial in fundraising New

approaches to governance have evolved and blurred the boundaries between academic and managerial roles within the university. The power to appoint members to university councils has become an area of contention. It has come increasing differentiation and changing expectations about knowledge creation and application. This has expanded the role of the academy and challenged the coherence and viability of the traditional academic role and loyalties to original disciplines. Based on the multitude of challenges in Hong Kong higher education, this book explores the future direction of Hong Kong academic profession. Hong Kong has arguably one of the best higher education systems in the world. At the heart of this system and indeed of any system is the academic profession. *The Changing Academic in Hong Kong* provides a convincing and multifaceted analysis of the professoriate. This book is essential for understanding Hong Kong's success and it has lessons for a broader understanding of the academic profession. Philip G. Altbach, Research Professor, Boston College, USA. The one book that has presented a complete portrait of recent changes and challenges to Hong Kong's academic profession, the book should be recognized as a classic. Futao Huang, Professor of Higher Education, Hiroshima University, Japan. Gerard Postiglione and Jisun Jung have successfully pulled together a strong team of researchers making significant contributions to the debates of changing academic profession, especially as universities in Hong Kong are developing new performance indicators in response to the University Governance Review by Sir Howard Newby. This volume is timely and highly relevant to researchers, academics, and policy makers in higher education with critical reflections on academic profession in Hong Kong. Ka ho Mok, Vice President, Lingnan University, Hong Kong. b. A very thorough analysis of the situation of the academic profession and its environment in Hong Kong. A setting which calls for and provides opportunities for internationality of higher education in a unique way but concurrently is tempted to make it itself a victim of the world-wide inclination of over-emphasizing visible research productivity. Thus the case of Hong Kong is presented as both exceptional and as prototypical for the search of the balance across the functions of higher education. Ulrich Teichler, Professor, International Centre for Higher Education Research, Kassel University, Germany. Hong Kong's higher education sector is a microcosm of many of the world's other systems: intensely urban, experiencing significant transformation, attuned to rankings and peer comparison, watchful toward government intervention, anxious about funding and always on the lookout for new performance indicators for faculty. Anyone interested in Hong Kong will find *The Changing Academic Profession in Hong Kong* a good read, but so will those of us concerned about trends, challenges, and possibilities at university systems in the rest of the world, particularly Asia. William G. Tierney, Professor, University of Southern California, USA. *World Development Report 2016*, World Bank Group, 2016-01-14. Digital technologies are spreading rapidly, but digital dividends: the broader benefits of faster growth, more jobs, and better services are not. If more than 40 percent of adults in East Africa pay their utility bills using a mobile phone, why can't others around the world do the same? If 8 million entrepreneurs in China, one-third of them women, can use an e-commerce platform to export goods to 120 countries, why can't entrepreneurs elsewhere achieve the same global reach? And

if India can provide unique digital identification to 1 billion people in five years and thereby reduce corruption by billions of dollars why can't other countries replicate its success Indeed what's holding back countries from realizing the profound and transformational effects that digital technologies are supposed to deliver Two main reasons First nearly 60 percent of the world's population are still offline and can't participate in the digital economy in any meaningful way Second and more important the benefits of digital technologies can be offset by growing risks Startups can disrupt incumbents but not when vested interests and regulatory uncertainty obstruct competition and the entry of new firms Employment opportunities may be greater but not when the labor market is polarized The internet can be a platform for universal empowerment but not when it becomes a tool for state control and elite capture The World Development Report 2016 shows that while the digital revolution has forged ahead its analog complements the regulations that promote entry and competition the skills that enable workers to access and then leverage the new economy and the institutions that are accountable to citizens have not kept pace And when these analog complements to digital investments are absent the development impact can be disappointing What then should countries do They should formulate digital development strategies that are much broader than current information and communication technology ICT strategies They should create a policy and institutional environment for technology that fosters the greatest benefits In short they need to build a strong analog foundation to deliver digital dividends to everyone everywhere

Fiscal Politics Vitor Gaspar, Mr. Sanjeev Gupta, Mr. Carlos Mulas-Granados, 2017-04-07

Two main themes of the book are that 1 politics can distort optimal fiscal policy through elections and through political fragmentation and 2 rules and institutions can attenuate the negative effects of this dynamic The book has three parts part 1 9 chapters outlines the problems part 2 6 chapters outlines how institutions and fiscal rules can offer solutions and part 3 4 chapters discusses how multilevel governance frameworks can help

A Future for Economics Christopher Maule, 2022-08-10 Economics is a discipline fundamentally concerned with effective coordination In that way its main concerns are very close to those of governance Economics like governance has evolved considerably over the last half century This book is a very modest attempt at gauging the relative importance of this tsunami and the way in which it might indicate what will be its future *A Future for Economics* proposes the reflections on this general theme by eight senior members of the economics profession who have all taught at some time in the Department of Economics at Carleton University in Ottawa a department that has always been known for its intellectual temerity and for its interest in extending the scope of economics beyond its traditional boundaries The Carleton sample of economists who share their views here have practiced in different sub fields of economics and have chosen to articulate their views and experiences in very different ways But their collective experience reflects a broad exposure to the ways in which the discipline has evolved both in academic circles and in the various organizations and institutions where they have practiced their profession in Canada and abroad

The Right of Communication to the Public in EU Copyright Law Justin Koo, 2019-05-30 This monograph conducts a comprehensive analysis of the EU right of communication to the public one of the exclusive rights under EU copyright law and provides an alternative framework for its interpretation and application The present state of the law is unsatisfactory there is uncertainty in the *acquis communautaire* and courts at the EU and domestic levels have struggled to apply the right Therefore the book identifies the problems with the existing right of communication to the public and proposes recommendations for reform In addition to reforming the scope of the right of communication to the public the jurisdiction and applicable law in relation to the right are analysed and changes are recommended Thus the book covers both the scope and practicalities of a coherent and effective reform of the

right In light of the continuing development and accompanying tribulations with this right at the EU level this book provides a topical and timely analysis that will be of interest to academics and practitioners working on EU copyright law Cited in Opinion of Advocate General Henrik Saugmandsgaard e joined Cases C 682 18 and C 683 18 Frank Peterson v Google LLC YouTube LLC YouTube Inc Google Germany GmbH and Elsevier Inc v Cyando AG ECLI EU C 2020 586 Court of Justice of the European Union 16 July 2020 The Law and Economics of Framework Agreements Gian Luigi Albano,Caroline Nicholas,2016-04-28 This book addresses the increasing demand for a logical understanding of how framework agreement should be used and implemented *The New Economic Diplomacy* Nicholas Bayne,Stephen Woolcock,2016-10-04 The New Economic Diplomacy explains how states conduct their external economic relations in the 21st century how they make decisions domestically how they negotiate internationally and how these processes interact Although the previous edition published in 2011 was able to reflect the impact of the financial crisis and the immediate reaction to it a lot has happened since then and the atmosphere of economic diplomacy has darkened To capture the emergence of new trends and the intensification of old ones the salient features of this new edition are The advance of China and other emerging powers at the expense of G7 governments despite some setbacks Much greater activity in negotiating regional and plurilateral trade agreements while the multilateral system struggles The persistence of problems exposed by the financial crisis notably the long running euro zone crisis The interaction between domestic and external forces the balance has shifted towards the domestic axis with international agreement more difficult to achieve This edition goes further in comparing the practice of different players to reflect the greater diversity of economic diplomacy Based on the authors work in the field of International Political Economy it is suitable for students interested in the decision making processes in foreign economic policy including those studying international relations government politics and economics It will also appeal to politicians bureaucrats business people NGO activists journalists and the informed public **Public or Private Goods?** Brigitte Unger,Daan van der Linde,Michael Getzner,2017-03-31 The book explores the core public tasks that the state has traditionally provided but which increasingly are being privatized and subsumed by the private sector The night watchman state role of providing security is instead offered by private prisons and security guards Legitimized by the argument of efficiency gains social security including public housing pensions unemployment insurance and health care are all being gradually privatized This book argues that on the basis of efficiency morality and equality there is still an overwhelming need for public intervention the res publica Although the state still funds and regulates core domains it provides fewer and fewer visible goods The authors show how this apparent invisibility of the state presents serious challenges for both income equality and democracy
